

Training programme SYNERGY LUB

Fundamental knowledge about industrial lubrication solutions for effective practice.

Teaching objective

Improve knowledge of technical teams in the field of industrial lubrication.

The advantages

- Innovative interactive teaching
- Review of prior learning before and after training
- Trainees involved at all times.

Course content (1 day)

- ☒☒Reminder of the principles of lubricating the bearings
- ☒☒Calculation of the quantity and frequency of lubrication
- ☒☒Practical implementation: manual and automated lubrication

Target audience

Maintenance technicians

Required Level

Basic knowledge about bearings
