

# GREASE ULTRA HIGH TEMP

## FOR BEARINGS OPERATING AT VERY HIGH TEMPERATURES

### SUITABLE FOR CONTINUOUS OPERATIONS AT EXTREMELY HIGH TEMPERATURES

**UP TO +260°C**

Available in 800g cartridge

### MARKET

- Food industry
- Brick factory
- Mechanical, chemical, nuclear, aeronautics and space industry
- Incineration plants, industrial paint lines

### APPLICATIONS

- Furnace equipment, kiln cars
- Equipment operating in the food industry
- Textile drying machines, paper/corrugated cardboard manufacturing machines, plastic industry
- Electric motors operating at very high temperatures
- Transfer Roller for copiers

### BENEFITS

- Excellent quality/price ratio
- Wide temperature range -30°C to +260°C, with +300°C peaks
- 100% synthetic (PFPE/PTFE) non-flammable grease
- Excellent resistance to aggressive media (solvents, steam acids) Extends considerably the lubrication intervals
- H1 Registered: usable in the food industry
- Compatible with most metals and elastomers
