

Brand of NTN corporation

WHEEL BEARINGS

As a world leading manufacturer, NTN helps both the vehicle manufacturers and independent aftermarket supply original quality components.

Inspired by your uncompromising standards and by the dedication of our teams, our expertise is also reflected in the service quality that underpins our business. Worldwide, we currently produce more than 100 million wheel bearings every year. NTN is both a global leader in wheel bearing manufacturing, and your day to day partner in business.

Why use the SNR brand?

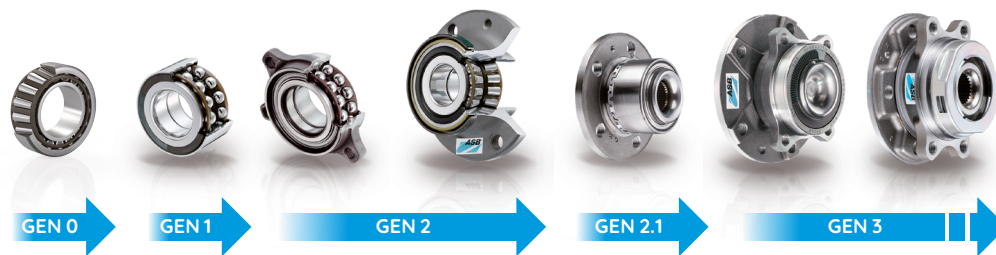

The largest product range on the market

- No. 1 wheel bearing manufacturer worldwide
- Applications covering **nearly 60 automotive manufacturer**
- Product **range depth covering up to 98%** of all vehicles registered in Europe
- **Excellent product range coverage (97%) of Asian vehicles**
- **Original or OE-quality bearings and components** in all our kits

Focus on wheel bearing kits

- **Original quality components sourced from carefully selected partners: guaranteed performance.**
- **Kits include all components required for installation.**

Focus on wheel bearing units

- With each new generation, **wheel bearings perform more and more functions** along with technological advancements.

Premium quality parts

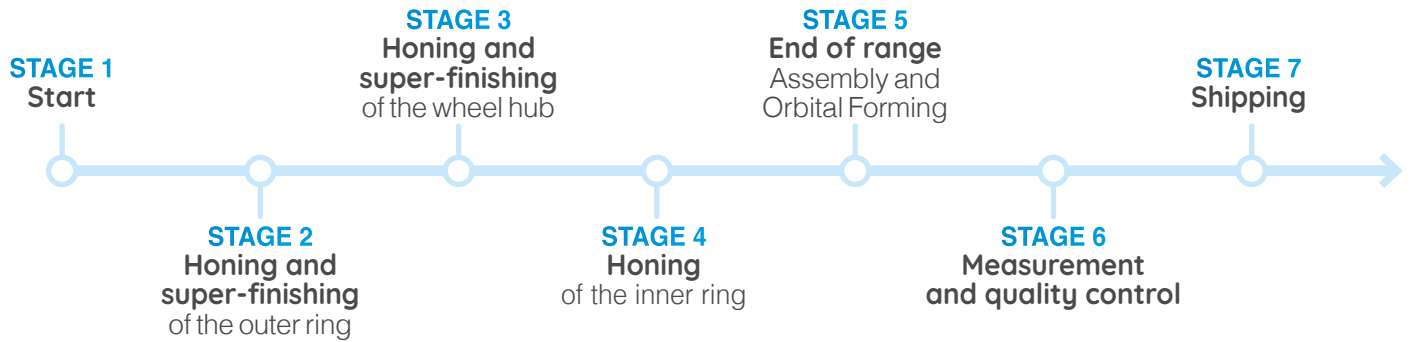

NTN Europe is the No. 1 manufacturer of wheel bearings, a safety-related component produced on every continent.

Quality and performance are the key to our success, product reliability and driver safety are also among our top priorities. Our bearings are designed and manufactured using the most advanced technologies in terms of steel, lubrication, heat treatment, seals, etc.

18 MONTHS OF TESTING FOR ALL PROTOTYPE BEARINGS

using the vehicle manufacturers specifications.

GEN3 wheel bearing manufacturing stages

Did you know that... ?

... our production site in Alès, France, is dedicated solely to the production of automotive bearings and equipped with innovative, state-of-the-art systems?

- In 2016, the CROUPILLAC factory was certified "Factory of the Future".
- Alès was certified FORD Q1 in 2021, in recognition of the factory's high performance level.
- The Alès site manufactures more than 800,000 bearings per month.

Ecological concerns among our top priorities

NTN is committed to working alongside vehicle manufacturers to develop high-performance components that conserve energy and protect the environment, especially with a view towards reducing the carbon footprint of motor vehicles. Specifically created to meet the demands of modern vehicles, SNR wheel bearings feature, among other things, the ability to withstand higher service temperatures and are optimised for high-speed operation. New materials such as ceramics are also used to enhance the technical performance of our products.

Our product range includes 93 wheel bearing kits for all-electric applications.

Wheel speed sensors

NTN Europe is the first manufacturer to offer a full range of wheel speed sensors combining all of the technologies available on the market today. Our ASB® wheel speed sensor range comprises some 400 part numbers and covers more than 8,000 vehicle applications.

Relying on SNR wheel speed sensors means relying on:

- the inventor of ASB® technology
- technical expertise in the design and manufacture of ASB® bearings
- 100% quality control during production
- advanced testing of all products

Services to support your daily business:

E-shop
eshop.ntn-snr.com/fr

- **Digital catalogue**
Covering the full automotive aftermarket range
- **Online order placement 24/7**

Videos and technical support

- «SNR Automotive Aftermarket» **YouTube channel**
- **NTN Europe website**
