NTN-SNR undertakes... 

Conscious of current social challenges and demands, and considering the company’s social responsibilities as a means of reasserting its identity and strengthening its cooperative commitments, NTN-SNR Roulements has done its utmost to provide a sincere and clear vision of its activities and commitments in terms of corporate social responsibility.

Unavoidable actor of the mechanic industry sector, NTN-SNR considers the CSR as a leverage to register itself in a continuous improvement process. The group focuses on the development of advanced technologies considering the expectations of its collaborators. Alongside, NTN-SNR puts its faith on an efficient and innovative R&D in order to reduce the environmental print of its products facing the technical challenges to come at one.
From CSR report to statement of extra-financial performance.

Changes to the regulatory framework of Corporate Social Responsibility are part of a willingness to move from reporting on practices in the area of CSR to building a corporate strategy based on a risk analysis.

The harmonisation of ISO standards, highlighting the importance of taking the expectations of interested parties (stakeholders) into account and the associated risks that the company could be taking by not responding to them, further strengthens this focus.

On the strength of this observation, NTN-SNR has chosen to base its approach on stakeholder consultations to better understand their expectations. 400 people responded, highlighting nearly twenty issues. This method of assessing our CSR risks enabled us to obtain a vision of the company that is both internal and external.

The materiality matrix, classifying the issues into the two strands of important and urgent, has been compared to the strategy of the Corporate Business Plan DRIVE NTN 100, and this cross-analysis has led us to retain 12 priority issues and 5 strategic lines above and beyond our regulatory obligations.

This document presents the main thrust of what we are implementing to make progress on these different topics.

The dialogue put in place this year with our stakeholders will continue in the years to come in order to measure changes in their perception. The result of these regular consultations should allow us to feed into the strategy of the group in order to better respond to the expectations of the stakeholders and to make CSR a factor of performance in the company.

Corporate Responsibility, NTN-SNR
Strategy and organisation

The NTN vision in 10 years:

- Move from a production company to a company that sells value to its customers through its products and services
- Transform our economic model
- Respond to changes in our environment: electrification, 4.0, digital...

Commitments

Safety is our priority:
We are all responsible for it

Environmental protection and the control of our risks are our concern

Our sustainability depends on the satisfaction of the stakeholders and in particular our customers

Ethic is our commitment
Business model

Valuable creation
Part of NTN, World leader in its fields of activity, 3rd global bearing manufacturer, 1st rank for Automotive wheel bearing, Second rank for constant velocity joints, we create products by applying the resources we have accumulated over our 100 years history to a value chain consisting of R&D, Procurement, Production and sales processes.

For this we rely on the following resources:
- Qualified and committed women and men
- Innovation, research and development at the heart of the company
- A recognized financial structure
- A local industrial system
- Environmental issues rooted in our practices
- A group close to its partners

With a value creation that goes through:
- Drive NTN100 plan
- Corporate values
- Market trends

The created value results are capital:
- Human
- Intellectual
- Financial - NTN group 3rd Japanese investor in 2018
- Industrial
- Environmental with an Ecovadis rating of 74% (Gold Level)
- Supplier
Methodology and scope

Since 2013 and the emergence of CSR at NTN-SNR, all of the actors that NTN-SNR interacts with are considered to be stakeholders: employees, customers, suppliers, local residents, etc. Dialogue with stakeholders has become a priority, beyond profit; we have reconsidered the way to create value.

NTN-SNR has strategic values and objectives; as for stakeholders, they have expectations: NTN-SNR has therefore structured a CSR strategy to meet its objectives and adapt to the priority needs of stakeholders.
15 KPIs (Key performance indicators)

As a measure of our progress and the effectiveness of the work carried out on these 5 strategic lines, the KPIs are calculated, when this is possible, following the 2 defined scopes - NTN-SNR Roulements (parent company and regulatory scope) and NTN-SNR Group (scope chosen for our CSR approach).

Measures for the climate
NTN-SNR presides over the Climate Club of the city of Annecy, an initiative which is defined as a consultative forum on themes such as global warming, energy savings, the development of renewable energies, etc.

Our involvement in the Climate Club reflects our commitment to meet the expectations of our stakeholders in environmental matters, and to engage in a policy of Sustainable Development consistent with the needs and expectations of the Commune of Annecy.

NTN-SNR, in collaboration with Grand Annecy, is building mobility plans: diagnostics and plan of action to develop travel solutions (car pools, public transport, soft modes of transport, etc.).
