# Bearings: the basics

Boost the performance of sales / logistics / technical teams

## Goals

- ✓ Familiarise the learner with the terminology and technical terms of the business
- ✓ Acquire basic knowledge of the various types of bearing
- ✓ Discover bearing assembly/disassembly techniques and tools
- ✓ Learn about lubrication and automatic lubrication solutions

## Strengths

- ✓ Modular training course
- ✓ Content is split into learning modules lasting around 20 minutes
- ✓ The modules:
  - Bearing technology + Symbolisation
  - 8 types of bearing (see below)
- ✓ A quiz accompanies each module to ensure the lesson has been learnt
- ✓ Speed of the lesson follows the pace of the learner
- ✓ Validation of progress through an initial/final test
- ✓ Knowledge may be certified at the end of the course

Estimated time:

- 13 twenty-minute modules
- (8 learning modules)
- 10 minutes per quiz
- Total duration: 6 hours

Sessions:

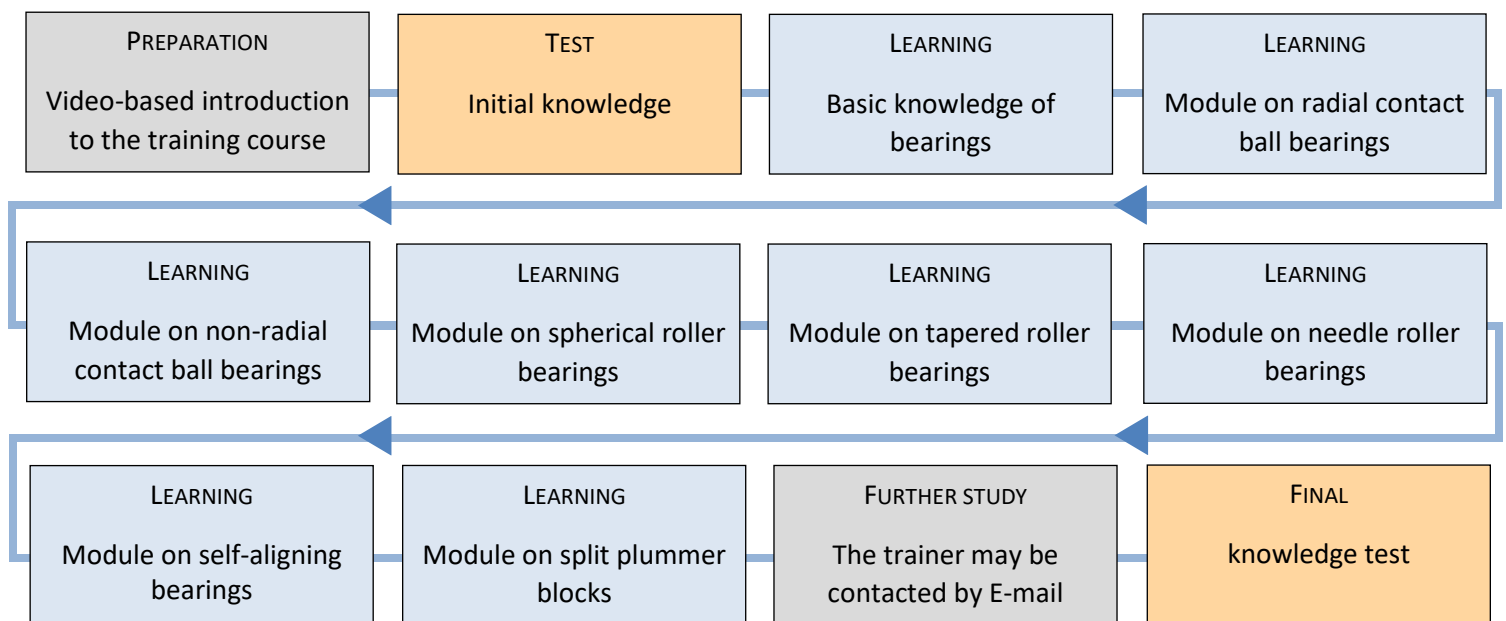

- Asynchronous and remote e-learning
- Individual - immediately available
- Group - subject to consultation

Price:

€400 (excluding taxes) per person

## Programme

### Target audience

Sales (office-based or mobile) / logistics / technical teams

### Prerequisites

No prerequisites to take this course. Some sales or technical experience is an advantage.

### Trainer: Thomas Herbst

After 10 years' developing bearings for industry and the car sector, Thomas has been training the sales and technical teams of NTN-SNR clients since 2010.
