MULTI AXIS SYSTEM

SNR Linear Axis can be quickly combined with each other and integrated into existing systems. They bring additional advantages through their reliability and durability. NTN-SNR Engineering provides one-stop support for the design of individual Linear Axis and the development of system solutions.

Through the optimal interaction of mechanics and electronics we offer short design times and optimized system configurations.

LINEAR AXIS RANGE

Linear engineering for professionals

www.ntn-snr.com
A WIDE RANGE OF LINEAR AXIS

SNR Linear Axes are universally applicable modules that accommodate the steadily growing requirements for the automation of installation and manufacturing processes. They are suitable for the most diverse applications in various industries: factory automation, machine tools, electrical engineering/electronic hardware, automotive industry, printing industry, special-purpose machines, clean-room applications in the semiconductor industry, food industry.

The modular design of our axes allows a high flexibility and thus can fulfill almost every customer request. SNR linear axes can be ideally combined with each other and integrated into existing systems. It also means lower assembling costs for the end user.

SNR has been established in the linear technology market since 1985 and strives to offer a complete and competitive product range. SNR Linear Axes are developed and manufactured in our plant in Bielefeld. With a well-organized network of sales engineers and sales agents worldwide we can offer you dedicated and competent technical support at any time.
