

HANDBOOK

Our industrial products
and services at a glance

Dear **NTN** partner,

We have been working successfully for years to set up and improve our collaboration towards our common goal, satisfaction of the final customer.

As a leading manufacturer of rolling bearings and linear technology, we accompany our partners through challenges imposed by the market.

We are proud of the global offer made up of our brands **NTN** and **SNR**. We continuously improve our offer thanks to new products, responding to technical criteria for highly demanding applications, or economic criteria for very competitive markets and standard applications. We want to constantly satisfy our ever-changing market. Whatever the challenge, we generally have the solution.

This **NTN** manual has been created by **NTN** sales, marketing and engineering teams and integrates our partners' feedback. It is a practical approach to help you, as an **NTN** partner, to feel comfortable with our wide range of products and services.

This **NTN** manual focuses on what you really need in your day-to-day business. It is a silent companion which will give you quick help and many answers about our company and products.

In parallel, we hope that through our regular communication, you will have the full picture of who we are: our range, our expertise, and our proximity. You are our ambassadors, and you help convince the final customer. We count on you to convey our philosophy and spirit.

We look forward to your feedback on this manual at any time.

Yours sincerely,

Eric MALAVASI
VP of NTN-SNR ROULEMENTS
Responsible for Industrial Business Unit Europe and Africa region

Let's make the world move forward

”

We are **NTN** in EUROPE and we make the world **NAMERAKA**.
We are people at the service of movement.
We design & offer high added value mechanical products.
Our expertise makes us a reference.
We believe in a fluid, mobile & harmonious society.
We are driven by our willingness to cooperate.
We continuously build positive mobility.

INNOVATION DRIVING YOUR PRODUCTION

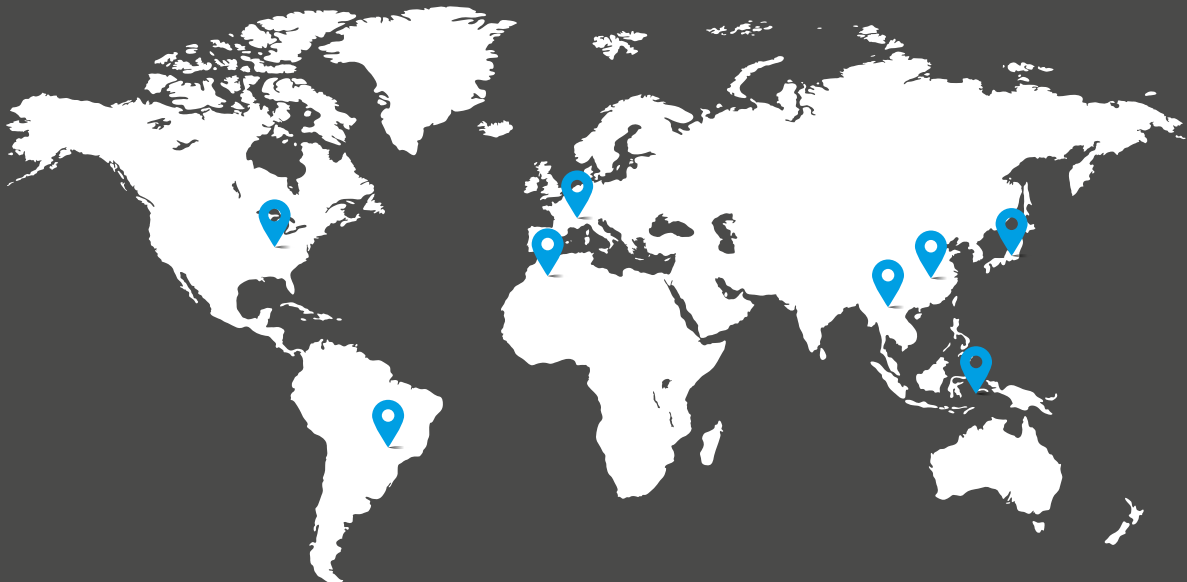

Movement. It is constantly changing. It is analysed, brought under control, guided and mastered with the aim of deriving maximum benefit. It is more than merely a concept. It is the very essence of our commitment, namely designing and innovating to deliver the perfect solutions to the issues and constraints of today and tomorrow.

There are thousands of us around the world masterminding and developing solutions to raise the bar on your production performance. Our world-leading brands (**NTN**, **BCA**, **BOWER** and **SNR**) are marketed worldwide and deliver the best-fit solutions for working together and building a more environmentally-friendly society. Follow our lead and use interaction, anticipation and adaptation as the keys to guiding and shaping the future of the manufacturing, automotive and aviation markets.

NTN

Customer satisfaction is the key to success; it requires a daily commitment to contribute to performance objectives. That is why **NTN** offers innovative solutions and technical expertise to serve your business.

Our brands

With high-tech products resulting from advanced R&D and design, the **NTN** brand offers a wide range of solutions adapted to your most demanding technical requirement and high-end premium quality requirements.

Simply smart, **SNR** products have been designed to make their user's life easier. The range is made of a combination of indispensable premium quality products that answer your needs efficiently.

BCA & BOWER are both trademarks of **NTN** Corporation. These brands are mainly sold in the North American market.

ACCESS TO OUR WEBSITE: www.ntn-snr.com

Information about our products and services

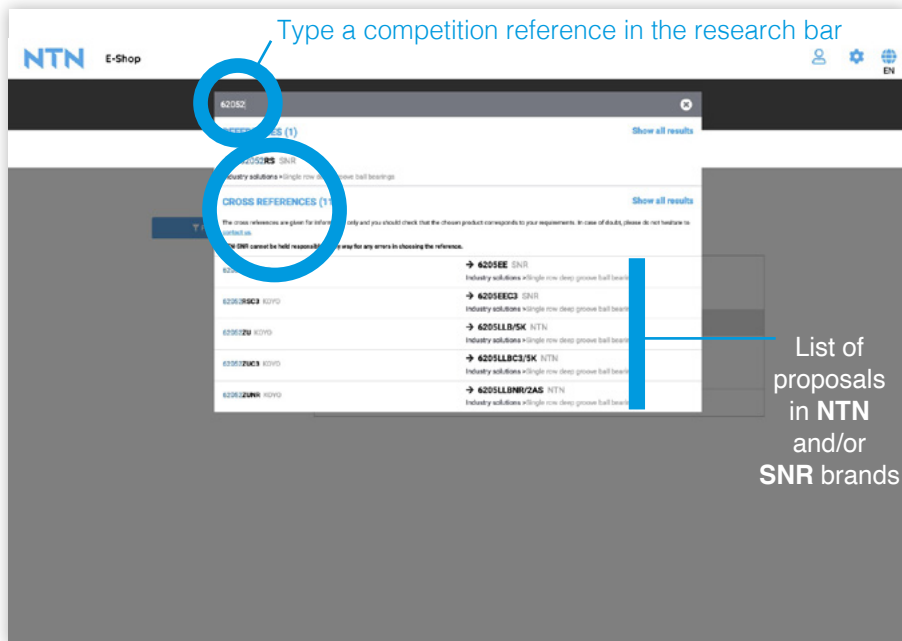

Download catalogues and flyers in the menu "OnlineTools" > "Documentation"

E-platform

ACCESS TO OUR E-SHOP: www.eshop.ntn-snr.com

Convert products to NTN and/or SNR

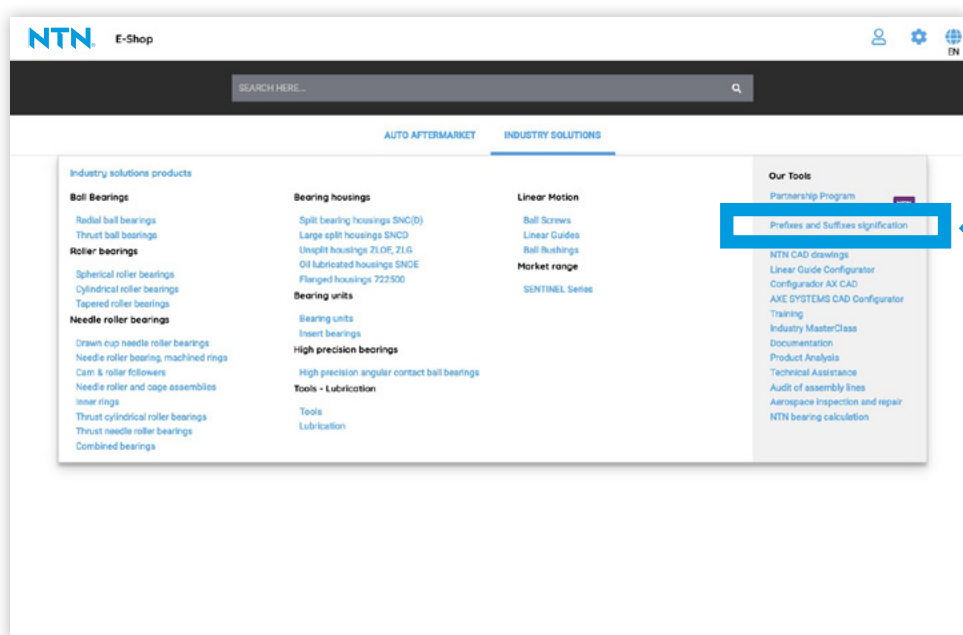

TIP

If an article is not found, you should vary slightly with the input of the suffix.

Example: 62052RSR
= 6205 2RSR
= 6205-2RSR
....

Prefix and suffix (tabular)

An extensive overview can be found in the e-shop (even without being logged in) on the left of the website in the "Our tools" menu → "Prefixes and suffixes signification". It is important to first select the right tab "Prefix or Suffix".

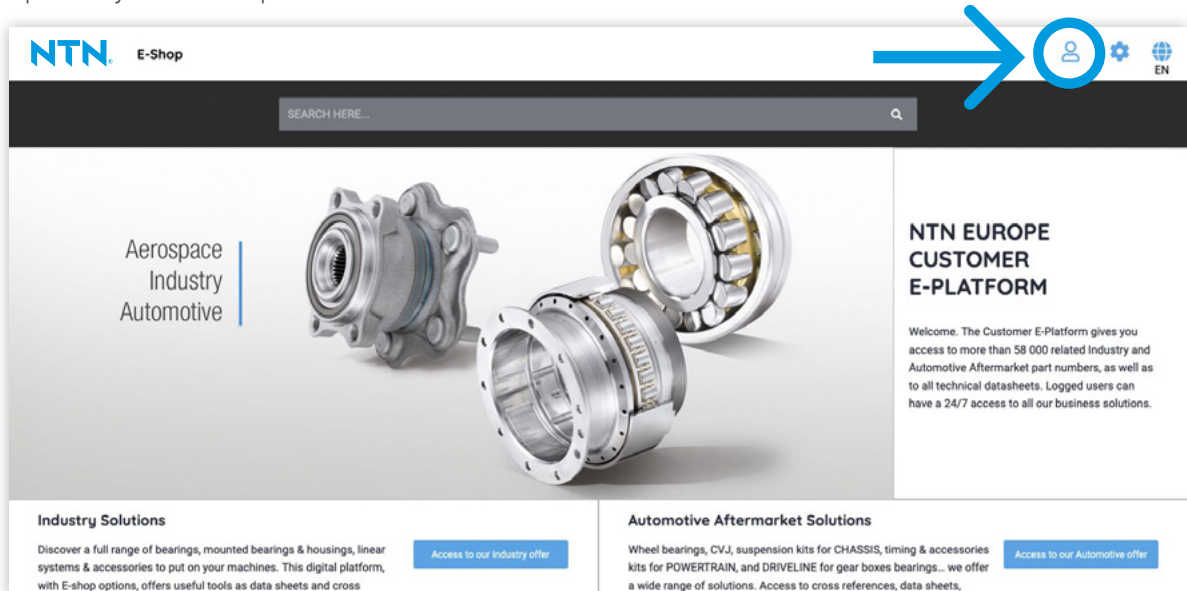

Note: More detailed conversion tables for our self-aligning bearing units and needle bearing ranges are also available as a separate document or desk pad. Don't hesitate to contact us.

Orders and access to information

When you are logged in, you have many options, such as configuring goods from our company or viewing order and delivery documents afterwards.

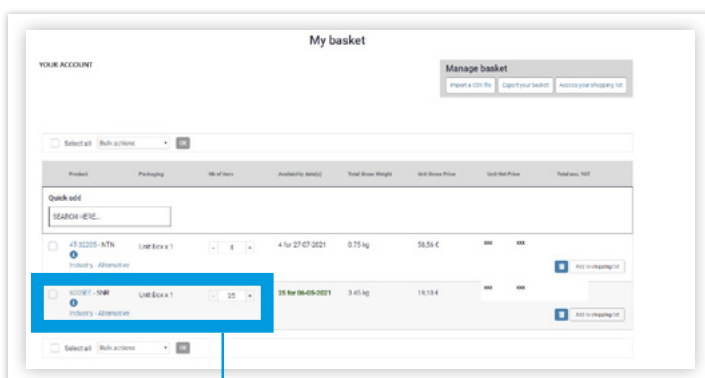

If you haven't already done so, simply apply for online access to our e-shop. Please do not hesitate to speak to your contact person in sales.

In the task bar at the top right of the e-shop you will find the corresponding menu items to make specific entries or to request information. On the right, for example, you will find the overview menu, which gives you access to all information regarding your offers, orders or deliveries. You can also configure your desired views under "Settings".

Shopping cart

Here you will find all information about your selected types once again bundled. You can also import and export complete lists.

TIP

By clicking on "Industry Alternative", you will be able to identify alternatives to requested product, with information on price and availability!

○ BEARING TECHNOLOGY

BALL BEARINGS

NTN - Deep groove ball bearings

Deep groove ball bearings are very common. The inner and outer rings have deep raceways, enabling them to support radial and axial loads in both directions, as well as combined loads resulting from the combination of all forces. Deep groove ball bearings are also suitable for high-speed applications.

NTN

The NTN brand offers you a wide range of deep groove ball bearings combining the best solutions for sealing, radial clearance and lubrication for an optimum response to the requirements of your activity.

Technical features

- High-end premium quality
- Very wide range with a strong sealing offer (see next page)
- CM tolerances as standard (normal internal clearance) at no extra charge
- Standard grease "5K" (Multemp SRL) suitable for temperatures from -40°C up to 150°C
- Suitable solutions for almost all applications

A WIDE RANGE OF DEEP GROOVE BALL BEARINGS OFFERING THE BEST PERFORMANCES IN THE MARKET

NTN bearings ensure **optimum performance and service life**.

Study carried out in 2021, based on the 3 main European market player catalogues

NTN
The highly
technical brand

GOOD TO KNOW!

5K lubrication benefits from an eco-label in its country of origin (Japan) and is more than 60% biodegradable (28 days).

Standard cage type and range overview

Cage design	Series							
	60XX	62XX	63XX	64XX	68XX	69XX	67XX	160XX
Pressed steel cage	6000	6200	6300	6403	6800	6900	6700	16001
	~ 6052	~ 6244	~ 6344	~ 6416	~ 6834	~ 6934	~ 6706	~ 16052
Machined cage	6056	-	-	-	6836	6936	-	16052
	~ 6084				~ 68-600	~ 69-500		~ 16072

Note:
618XX = **NTN** 68XX
619XX = **NTN** 69XX

Sealing concept

NTN

Basic concept

All deep groove ball bearings, irrespective of size, are manufactured with a "V"-shaped groove in the inner ring, which, depending on the design, acts as a labyrinth seal in conjunction with the seal.

During the operating cycle of the bearing, the reduction of interference from the inner lip gradually brings the outer lip into contact with the inner ring.

Benefits

- Particles are kept away or evacuated
- Grease is pressed inwards
- High performance for long-lasting protection

Overview of **NTN** standard seals

Types and codes		Shielded type		Sealed type	
		Non-contact type ZZ	Non-contact type LLB	Contact type LLU	Low torque type LLH
Construction					
		Metal shield plate is fixed to the outside ring; the inner ring incorporates a V-groove and labyrinth clearance.	The outer ring incorporates synthetic rubber molded to a steel plate; seal edge is aligned with V-groove along inner ring surface with labyrinth clearance.	The outer ring incorporates synthetic rubber molded to a steel plate; seal edge contacts V-groove along inner ring surface.	Basic construction is the same as LLU type, but a specially designed lip on the edge of the seal prevents foreign matter penetration; low torque construction.
Performance comparison	Torque	Small	Small	Higher	Medium
	Dust proofing	Good	Better than ZZ-type	Excellent	Much better than LLB-type
	Water proofing	Poor	Poor	Very good	Good
	High speed capacity	Same as open type	Same as open type	Limited by contact seals	Much better than LLU-type
	Allowable temp. range ⁽¹⁾	Depends on lubricant	-25 to 120°C	-25 to 110°C	-25 to 120°C

1) Please consult **NTN** Engineering about applications which exceed the allowable temperature range of products listed on this table.
Note: This chart lists double shielded and double sealed bearings, but single shielded (Z) and single sealed (LB, LU, LH) are also available.
Grease lubrication should be used with single shielded and single sealed bearings.

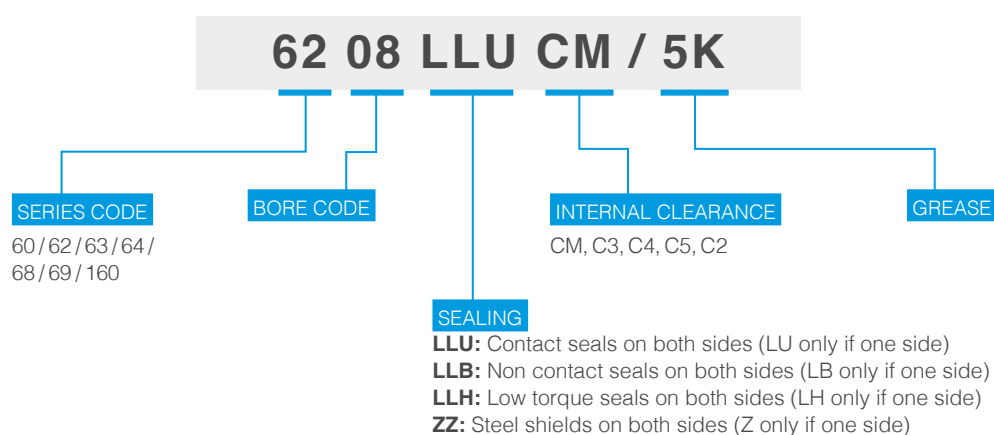

For more information, check online **NTN** Ball & Roller Bearings catalogue on www.ntn-snr.com/documents

CM tolerance for low-noise performance

- Standard: reduced bearing clearance tolerances reduce vibrations and decrease the noise level
- CM radial clearance available for entire **NTN** standard 6xxx deep groove ball bearing range
- Available for open, shielded and sealed versions (-ZZ, -LLU and -LLB)

Designations

More info about prefix, suffix & interchange table? Check from page 42

Focus on NTN electrically insulated bearings: MEGAOHM™

NTN

Technical features

- Withstanding up to 3 000 VDC as standard
- Ceramic layer on outer ring
- In accordance with standards ISO 492, DIN 620 and JIS 1514

Range overview

- Massive brass cage available from stock (L1B Suffix)
- Steel cage on request
- C3 internal clearance as standard available from stock
- C4 internal clearance on request

Benefits

- Avoid premature damage due to current leakage
- Strength thanks to the brass cage
- Ensured interchangeability
- Available stock for most popular references (Deep groove ball bearings in 62xx & 63xx series)

	Bore diameter code													
Series	10	12	14	15	16	17	18	19	20	22	24	26	28	30

For more information, check online brochures www.ntn-snr.com/documents/megaohm

SENTINEL™ series

NTN stainless steel deep groove ball bearing with spot-pack solid grease (LP09) as lubricant is the best opportunity to mix security for food/beverage industries and sustainability for the production equipment.

Technical features

- 440C stainless steel bearing, 304 stainless steel cage
- Specific nitrile seal reinforced
- **NTN** spot-pack solid grease (LP09), NSF approval / H1 category code
- Operating temperature: from -10°C to +80°C (100°C peak)

Benefits

- 440C material is the best compromise between load rating capacity and corrosion resistance
- Solid grease reduced lubricant leakage even when bearing is subjected to high vibration and centrifugal force
- Compare with general-purpose food grease lubricant, solid grease is less prone to emulsification and leakage due to water penetration
- Solid grease with spot-pack application offer a good level of speed rotation while maintaining solid lubricant advantages

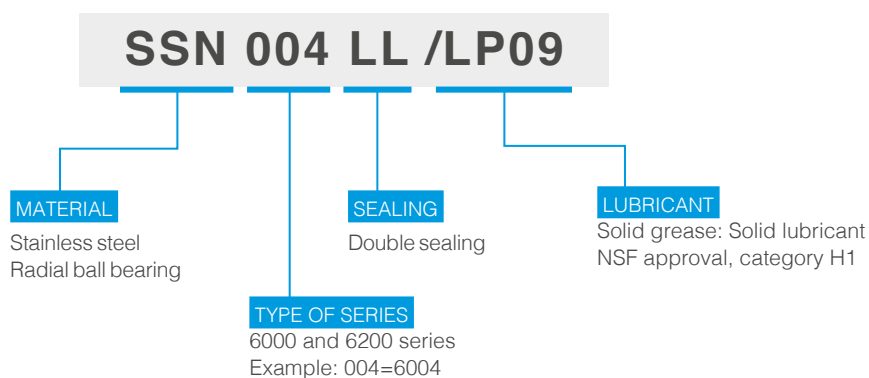

Range overview

Code bore P/Ns

- From 000 to 008 (6000 to 6008)
- From 200 to 208 (6200 to 6208)

Designations

SNR - Deep groove ball bearings

The simply smart brand

NTN proposes the **SNR** simply smart range of deep groove ball bearings. It is a compact range that contains the indispensable sizes and offers standard sealing options with premium brand quality.

The simply smart brand

Technical features

- Normal internal clearance and C3
- **SNR** deep groove ball bearings are designed with a steel cage as standard - options on request
- Sealed versions are already greased.
The maximum operating temperature is +120°C
- Suitable solutions for almost all applications

Range overview

A range with continuous technical improvement to meet the needs of your application

Study carried out in 2022, based on the main European market player catalogues

EFFICIENCY
COMES FIRST

Double-row deep groove ball bearings

Double row deep groove ball bearings are designed to accept higher loads than a single row ball bearing.

They have identical outside diameters and bores but are slightly wider, thus having a much higher load capacity.

Technical features

- Polyamide cage as standard (no suffix)
- Without filling slot (suffix A)
- Normal internal clearance
- Open type

Range overview

Serie	Bore diameter code

EMTR

Focus on our ball bearing range dedicated to electric motors

- Deep groove ball bearings of series 6000, 6200 and 6300
- For applications with specific temperatures or speed requirements

Are you looking for higher reliability and quality, with the lowest noise level, without compromising on price?

The new EMTR bearing range with optimised design for electric motors brings you the solution.

Technical features

- C3 internal clearance
- Special low noise grease
 - Up to 150°C usage: no suffix in the designation
 - High temperature usage (up to 200°C): D189 suffix
- Precision Class P6 (ISO 492) and improved grade for balls (G10) with special vibration check
- Benefit:
 - Raceway roughness: improved by 25%*
 - Raceway roundness: improved by 20%*

* Compared to **SNR**'s standard tolerance

Benefits

Range overview

6201 >> 6206 + 6304

Designations

The unique range of ball bearings dedicated to extreme applications.

Deep groove ball bearings of series 6000, 6200 and 6300.

For applications with specific temperatures or speed requirements.

- High availability to solve problems quickly
- A unique product range from a premium brand
- A ready to use range for specific applications
- Wide selection of bore diameters for the 6000, 6200 and 6300 series
- Technically optimised products: cage, internal clearance, lubricant and seals
- The technical support from our teams

**“A bearing
for each
specific use”**

* N.Dm is a speed factor where N is the speed of rotation in rpm and Dm is the average diameter of the bearing $(d + D)/2$

TOPLINE

The unique range of ball bearings dedicated to extreme applications

Products	Cage	Internal clearance	Grease	Sealing	Other	Temperature range
HVZZ	Glass fibre reinforced polyamide 6.6	C3	Superior quality. Lithium thickener + synthetic base oil	Steel shields	Precision P6, P5. High-precision balls (<= Class 10)	-20°C to +120°C
LT LTZZ	Steel	C3	Suited to low temperatures. Lithium thickener + synthetic base oil	Nitrile rubber seals (NBR) or steel shields	-	LT: -40°C to +100°C LTZZ: -60°C to +120°C
FT150 FT150ZZ	Steel	C3	Adapted to high temperatures. Polyurea thickener + synthetic base oil	Fluoroelastomer seals (FKM) or steel shields	-	-30°C to +150°C
HT200 HT200ZZ	Steel	C4	Adapted to high temperatures. PTFE solid lubricant and PFPE oil	Fluoroelastomer seals (FKM) or steel shields	Specific heat treatment	-40°C to +200°C
F605	Steel	Multiple of C5*	**	-	Brand is stamped	Temperature range between +200°C and +350°C (continuous or cyclic)
F600	Steel	Multiple of C5*		-	Specific surface treatment (phosphatisation + MoS2 deposition)***	
F604	Steel	Multiple of C5*	Suitable for very high temperatures. Polyalkylene glycol base oil + solid additive	Steel shields	Brand is stamped	

* Significantly increased internal clearance to offset the material's expansion effects.

** In case of F600 and F605, if additional lubrication is required, an appropriate amount of grease may be introduced into the bearing. Contact **NTN** for more information.

*** Surface treatment for greater oxidation resistance and improved lubrication. Caution: F600 and F604 products must be used with care in damp environments, since MoS2 may react with water to produce sulphuric acid.

NTN - Angular contact ball bearings

NTN

NTN - Single row angular contact ball bearings

The single row angular contact ball bearing is designed to withstand combined loads with a predominant axial component. Installed in opposition with another bearing of the same type, it guarantees high mounting rigidity.

A wide range for standard industry applications.

Technical features

- Contact angle 30° (without suffix) or angle 40° (B suffix)
- Pressed steel cage (without suffix) or massive brass cage (L1)
- Single row series: 7000, 7200, 7300
- Universal pairing available (G suffix: Flush ground*)
- Clearance as standard
- Preload on demand

NTN

NTN - Four point contact bearings (QJ-bearings)

Four-point contact ball bearings are single row radial angular contact ball bearings with raceways designed to withstand axial loads in both directions.

Technical features

- Standard contact angle: 30°
- Massive steel cage as standard
- Split inner ring
- Available series: QJ2xx and QJ3xx

More info about prefix, suffix & interchange table check from page 42

* "Flush ground" is the name given to the finishing method where the offset of the front and back faces of the bearing are ground to the same value. This allows a designated clearance or preload value to be achieved when using bearings with identical codes in DB or DF orientations. DT series bearings can also be used in various arrangements to achieve uniform load distribution.

NTN and SNR - Double-row angular contact ball bearings

NTN

SNR

Double-row angular contact ball bearings have a similar configuration as two angular contact ball bearings but have the advantage of a smaller space requirement. These bearings support axial and radial loads in both directions.

NTN and SNR: two brands to offer you a full range of possibilities.

Technical features

- Two cage variants: pressed steel (suffix S in **NTN**) or polyamide (suffix A or G15 in **SNR**)
- Open or sealed with steel shields (-ZZ) or seals (-LL in **NTN** or -EE in **SNR**)
- Careful:
 - Contact angle 25° without filling slot ► **NTN** or **SNR**
 - Contact angle 32° with filling slot ► only **NTN**

Standard cage type and range overview

SUFFIXES FOR OPEN SERIES

SERIE	NTN	SNR	TYPE
3XXX	S	-	32° contact angle with filling slot Pressed steel cage Ungreased
	-	A	25° contact angle without filling slot Polyamide cage Greased
5XXX	S	-	25° contact angle without filling slot Pressed steel cage Ungreased

SUFFIXES FOR SEALED SERIES WITH SHIELDS

SERIE	NTN	SNR	TYPE
5xxx	SCZZ	-	25° contact angle without filling slot Pressed steel cage Greased
	-	ZZG15	25° contact angle without filling slot Polyamide cage Greased

SUFFIXES FOR SEALED SERIES WITH SEALS

SERIE	NTN	SNR	TYPE
5xxx	SCLLD	-	25° contact angle without filling slot Pressed steel cage Greased
	-	EEG15	25° contact angle without filling slot Polyamide cage Greased

Note:

Be careful with cross references on this product type.
Some important discrepancies exist on series number.

Example:

FAG 3201-B-2RS-TVH corresponds to **SNR** 5201EEG15

In **NTN** and **SNR** ranges:

3XXX row is open (note contact angle if necessary)

5XXX is usually sealed (-ZZ or -EE / -LL)

NTN and SNR - Self-aligning ball bearings

Self-aligning ball bearings have two rows of balls, their outer ring raceway forms a spherical surface and their inner ring has two raceways. The balls, cage and inner ring of these bearings are capable of shifting to compensate for a certain degree of misalignment with the outer ring. Consequently, these bearings are able to align themselves and compensate for shaft / housing finishing unevenness, bearing fitting error and other sources of misalignment. These bearings are designed to support radial loads and are not suitable for applications with heavy axial loads.

Technical features

- Contact angle bearing
- Steel cage (**NTN**) or polyamide cage (**SNR** – G14 / G15 suffix)
- Clearance: normal, C3, C4
- Cylindrical or tapered bore
- Sealed products available in **SNR** brand for 22xx & 23xx series (-EE suffix)
- Wider inner ring range available in **SNR** brand (112xx & 113xx series)

Standard cage type and range overview

NTN and SNR - Thrust ball bearings

NTN

SNR

Thrust ball bearings are designed to support axial loads. Single direction thrust ball bearings support the axial load of a shaft in only one direction.

Technical features

Thrust ball bearings consist of separable elements:

- Shaft locating washer
- Housing plate
- Ball-ring

Standard cage type and range overview

NTN - High precision bearings

Precision rolling bearings, which are generally also referred to as spindle bearings, are primarily used in machine tools. Generally, the optimal bearing must be selected to suit the nature of the machine, the area within the machine, the spindle specification, bearing type, lubrication system and drive system of the intended machine through considerations of the design life, precision, rigidity and critical speed of the bearing.

Offer

- Standard, open
- Standard, sealed
- High-speed, open
- High-speed, sealed
- All bearings are also available with ceramic balls ("5S")

ULTAGE™ performance

Stock of pairable universal bearing called 'Flush ground' bearings ("G") with normal preload ("GN").

Sets and bearings with restricted tolerances can be offered individually (O-, X-, tandem etc.).

Universal matching of NTN high precision bearings

Angular contact ball bearings are often combined in different arrangements for special purposes. Thanks to the flush grinding technique, the face height difference between the inner and outer rings is equal on both faces of a universal bearing (G suffix). Thus, you can assemble various bearing arrangements and achieve the specified preload:

1 Bore and outer diameter deviation shown on the boxes label:

2 Δd and ΔD permissible values for matched bearings set:

7000 series*	Maximum permissible Δd in μm	Maximum permissible ΔD in μm	7900 series*	Maximum permissible Δd in μm	Maximum permissible ΔD in μm
7000 ▶ 7015	2	2	7900 ▶ 7917	2	2
7016 ▶ 7024	2	3	7918 ▶ 7924	2	3
7025 ▶ 7026	3	3	7925 ▶ 7926	3	3

*For P4, P42 precision

3 Determination of Δd and ΔD :

Δd = bore size difference in a matched set (μm) = $|d_1 - d_2|$
 ΔD = OD size difference in a matched set (μm) = $|D_1 - D_2|$

4 Example of duplex arrangement:

SNR - High precision bearings

Machline is a complete line of precision bearings. It combines high rotation speed and increased load capacity to meet the ever-increasing requirements of your machines.

The ML and CH ranges have been specially designed to withstand very high rotation speeds.

The sealed MLE range has lifetime lubrication and thus eliminates periodic greasing.

All Machline spindle bearings are produced to the P4S precision specification, which incorporates ISO 4 (ABEC 7) dimensional tolerances and ISO 2 (ABEC 9) dynamic tolerances.

Offer

- Machline high precision: standard
- Machline ML: high Speed
- Machline MLE: sealed
- Machline CH: hybrid (available in all ranges)

All Machline bearings are available in the universal version (U), as a universal bearing set (DU, TU) and a matched bearing set (DB, DF, DT...).

CYLINDRICAL ROLLER BEARINGS

ULTAGE® NO TIME OUT

Cylindrical roller bearings

Defined according to ultimate design rules, the **NTN ULTAGE™** cylindrical roller bearings set the new performance benchmark for your industrial equipment and machines.

Our high-resistance polyamide cage technology, a unique solution on the market, extends the field of use of **NTN** bearings to demanding applications.

Check out a reliable solution for minimising your maintenance operations.

ULTAGE™, setting the standard for supreme performance

NTN®

NTN - Single-row cylindrical roller bearings

Thanks to their rolling elements with line contact on the raceways, the cylindrical roller bearings can support high radial loads. The rollers are guided by shoulders on the outer and/or inner ring and are therefore suitable for high speed applications. Cylindrical roller bearings are separable, allowing them to be easily mounted and disassembled even when interference fits are required.

Technical features

5 configurations of ring shoulders are available:

- NU & N are non locating bearings and can't support any axial load
- NJ, NF & NUP are locating bearings. NJ & NF provide an axial guidance through the bearing in one direction; in the two directions for the NUP design

6 main ISO dimensions series:

From the lightest 10.. to the heaviest 4..

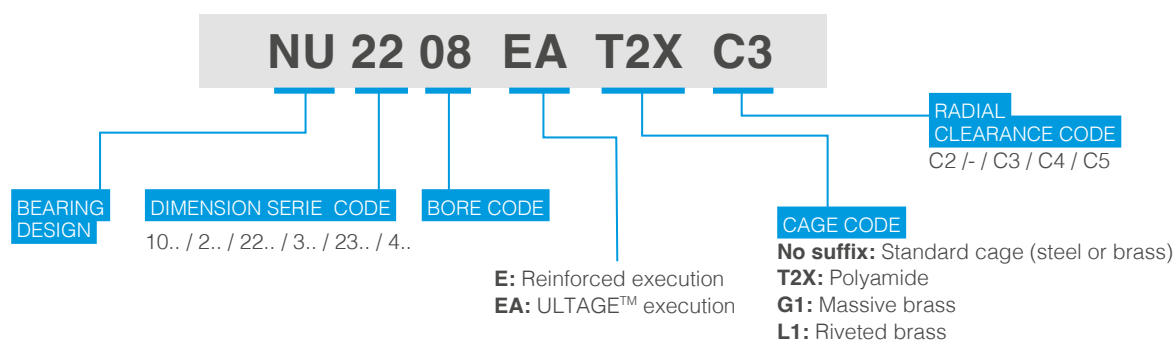

3 technologies of cage:

- Polyamide (T2X), standard type: economic, light weight and quiet operation
- Pressed steel (no suffix), standard type for non E design
- Brass cage (massive G1 or riveted L1) for the largest series and demanding applications

Designations

NTN

ULTAGE™ offer

ULTAGE™

ULTAGE™ performance series for NU, NJ, NUP, N and NF types in the ISO dimension series 22.., 22.., 32.. and 23..

- Rollers with advanced profile, for an optimal contact stress distribution on the raceways and reduction of edge stresses
- Optimised internal specification for lower operating temperature and improved allowable rotation speed
- High performance glass-fibre reinforced polyamide, for high rotation speed and long grease service life as well as quiet operation

Benefits from using ULTAGE™ (compared to previous design):

- Higher level of dynamic load Cr, one of the highest on the market
- Operation under larger misalignment, up to 2 mrad
- Longer service life
- Lower operating temperature for higher rotation speed, under oil lubrication

(*): T2X polyamide cage is the standard cage except for bore codes 20 and 22, with massive brass G1

NTN - Double-row cylindrical roller bearings

Double row cylindrical roller bearings are designed for very heavy loaded applications. With cages, they offer the best compromise for moderate to high rotation speed; without cage (full complement type), they incorporate the maximum number of rollers for the maximum load capacity.

With cages

Non locating bearing

NN49..(K) and NNU49..(K) Bore diameter $\varnothing d = 100 \text{ mm} - 500 \text{ mm}$

NN30..(K) Bore diameter $\varnothing d = 25 \text{ mm} - 460 \text{ mm}$

For heavy loaded applications, under moderate to high rotation speed.

Full complement type

Locating bearing

SL01-48.. and SL01-49.. Bore diameter $\varnothing d = 50 \text{ mm} - 400 \text{ mm}$

Semi-locating bearing

SL02-48.. and SL02-49.. Bore diameter $\varnothing d = 50 \text{ mm} - 380 \text{ mm}$

For extremely loaded applications, under low to moderate speed (large construction machinery, steel industry machinery...).

Full complement type - Bearing for sheave

SL04-5.. Bore diameter $\varnothing d = 40 \text{ mm} - 440 \text{ mm}$

- Locating bearing
- Outer ring phosphate coated
- With or without snap rings on outer ring
- With seals or shields
- With or without relubrication on outer ring

NTN - Four-row cylindrical roller bearings

4R series for roll necks of steel rolling mill

- Bore diameter $\varnothing d = 100 \text{ mm} - 1\,030 \text{ mm}$
- Plain rollers or hollow rollers with pin cage for the highest load rating
- Through hardened or case hardened steel for better crack and shock resistance
- Corrosion resistance with phosphate coatings
- Various configuration of seals, ring designs, bores (tapered bore, circulating oil groove, ...)

TAPERED ROLLER BEARINGS

RESISTS ALL, EXCEEDS COMPARISON

Inch or metric, the range of **NTN** tapered roller bearings covers all of your needs and will bring you the highest reliability whatever the conditions of use.

Available in our logistics center dedicated to distribution, our offer has been designed to achieve one goal: your satisfaction!

NTN®

NTN and SNR - Tapered roller bearings

The tapered roller bearing consists of 2 loose elements: the inner ring (cone) with tapered rolling elements + the cage (we could also say “the mounted cone”) and the outer ring (cup).

This is the best bearing solution for supporting combined axial & radial heavy loads.

The single row type is usually used by pair, the operating clearance or preload is adjusted during the mounting of the bearings.

A set of preloaded tapered roller bearings offers, in addition to a high load capacity, the necessary high rigidity required inside the gearboxes or transmission.

Benefits

A complete range of tapered roller bearings from the world's second largest manufacturer (approx. 100 million units/year), with ISO metric and ABMA inch series.

- Under **NTN** brand, **complete ranges of metric and inch series**, with high technology products
 - A metric range that covers all the market needs
 - A numerous inch range (>270 series), that is the best alternative to the market leader
 - High quality steels, with case hardened steel and through hardened steel
 - The larger sizes under the label ULTAGE™, with the highest performance on the market
 - 2 and 4 rows for specific applications
- Under **SNR** brand, **a compact range of metric series** that covers the **essential needs** with all the **benefits of a premium brand** without any technical compromise
 - An “Easy to Work” range, with only 1 bearing part number per dimension
 - New opportunities of competitiveness in the European market
 - High quality products, a range approved by many major European OE customers

NTN and **SNR** ranges represent approximately 1900 part numbers in the European gross price list, to meet the market needs with the adequate tapered roller bearing.

Metric series range overview

NTN metric tapered roller bearings, the complete range

NTN

- 10 standard metric series, including 1 steeper angle series with suffix D (= 313xx in Europe)
- 3 additional steeper angle series 322xxC, 323xxC (suffix C **NTN** = suffix B in Europe) and T7FCxxx
- Bore diameter from 15 mm to 850 mm (440 mm in catalog)
- Case hardened steel (prefix "4T-") or through hardened steel (suffix "U"), interchangeability for both
- Pressed steel cage
- Tolerance: ISO492 normal class
- Designation:
 - For case hardened steel: **4T-32006X**
 - For through hardened steel: **32018XU**

SNR metric tapered roller bearings, the simply smart range

SNR

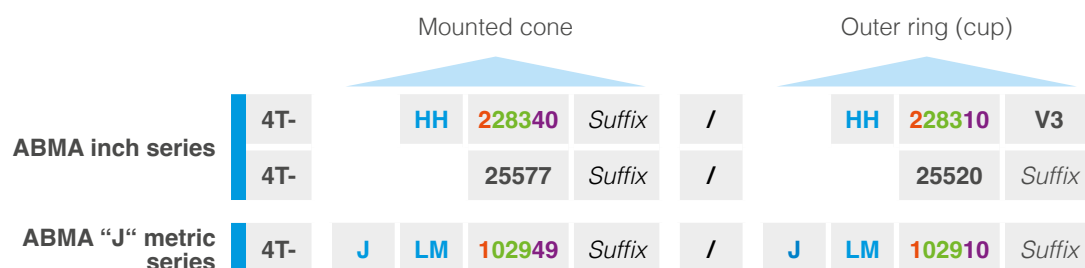

- 9 most popular metric series, including 1 steeper angle series 313xxA
- Outer diameter < 200 mm
- High grade through hardened steel
- Pressed steel cage
- Tolerance: ISO492 normal class
- Easy to work range: designation with only 1 suffix A → **32014A**

Inch series range overview

NTN inch series tapered roller bearings, the best alternative to the market leader

- >270 series defined according to ABMA standard
- Bore diameter from 12.7 mm to 1270 mm
- 100% case hardened steel, with the prefix "4T-"
- Pressed steel cage
- Tolerance: ANSI/ABMA std 19 class 4 or ANSI/ABMA std 19.1 class K or N for metric J series
- Designation:

Duty class prefix	Code	Included cup angle	Series number	Component number
EH Extra Heavy series	1	0 to 23°59'59.99"	0-9	Cone -> 30 to 49 (and 20 to 29)
EL Extra Light series	2	24° to 25°29'59.99"	00-99	Cup -> 10 to 19 (and 20 to 29)
H Heavy series	3	25°30' to 26°29'59.99"	000-999	
HH Heavier than Heavy series	4	27° to 28°29'59.99"		
HM Heavy-Medium series	5	28°30' to 30°29'59.99"		
L Light series	6	30°30' to 32°29'59.99"		
LL Lighter than Light series	7	32°30' to 35°59'59.99"		
LM Lighter-Medium series	8	36° to 44°59'59.99"		
M Medium series	9	45° and over, excluding thrust		

- Cone and cup can be managed separately, each cone of the same series could be associated with one cup of the series
- Interchangeability is guaranteed. It is recommended to not mix cones and cups from different origins, for optimal performance after assembly
- A reduced stock allows to generate many bearing combinations:

Example: **25500 series**

4T-	25572		4T-	25572	25520
4T-	25577		4T-	25577	25520

High performance steel

NTN

SNR

2 technologies of steel, used as standard

Carburised (case hardened) steel

Carburising hardens the steel from the surface to the proper depth, leaving a relatively soft core. This provides hardness and toughness, making the material suitable for impact loads.

Case hardened steel is applied to rollers and both rings and could be identified by the prefix "4T-". It is the standard material for all inch series.

Through hardened steel is obtained from high grade carbon chromium bearing steel. It is applied to larger **NTN** bearings from metric series and to all **SNR** range.

NTN	BEARING SIZE		
	Small	Medium	Large
Inch			
Metric			

● Case hardened steel 4T-
 ● Through hardened steel U

2 technologies of NTN steel offer the same basic rating life

Case hardened steel offers additional benefits such as:

- **Better resistance to cracks**, especially in case of high tight fit condition
- **Better resistance to shocks loads**, thanks to its resilient core

GOOD TO KNOW!

Inch and metric tolerance systems are not defined in the same way for diameters: in the inch tolerance system, diameters are defined to positive whereas in the metric tolerance system, they are defined to negative (versus nominal diameter).

A special attention has to be put on the shaft diameter definition!!!

Example: Inch bore diam. (in mm) ► $\varnothing 111.125^{+0.025}_0$

Metric bore diam. (in mm) ► $\varnothing 105^0_{-0.020}$

ULTAGE™ large size metric series ($OD \geq \varnothing 270\text{mm}$) deliver longer life, higher load ratings, and higher speed capabilities.

Developed as the new standard of **NTN** bearings, the **ULTAGE™** series will contribute to improvements in industrial machinery today and into the future.

Technical features

ULTAGE™ offers the **highest level of reliability**, thanks to:

Optimised crowning on rollers, for a better load distribution on raceways.

- Basic load rating **Cr**: **+30%** larger than conventional bearings
- Service life: **x3 longer** than conventional bearings
- **Higher allowable misalignment**: 0.0017 rad (6') is achievable for 0.27Cr, with a minimum required load 0.04Cor.

Improved allowable rotation speed, resulting from an optimized design between the roller large face and the cone large rib.

- Lower torque and lower temperature rise.
- Higher rotation speed, **up to +10%**

Improved dimensional stability over time, with a special heat-treatment to the bearing steel, for a better dimensional stability over time and less dimensional changes during operation:

- 1/10 compared with standard through hardened steel
- 1/4 compared with case hardened steel

Benefits

Designation of **ULTAGE™** TRB:

Additional suffix "UTG" 30328 U **UTG**

SPHERICAL ROLLER BEARINGS

By offering you the most extensive range of spherical roller bearings on the market, we can now fulfill the needs of all your applications. Working in our modern factories in Europe and Japan, our experts design and manufacture bearings with bores from 25 to 1 400 mm.

Our new catalogue presents our full product range, including our exclusive KIZEI®.

The quality of the selected materials, our high manufacturing standards and our unique designs deliver the highest level of performance.

An unrivalled extensive product range!

NTN®

NTN and SNR - Spherical roller bearings

Spherical roller bearings are engineered to offer excellent resistance to high temperatures and loads, meaning that they are capable of withstanding the harshest applications.

- Misalignment
- Shock & vibration
- Pollution
- Performance and wear resistance

A wide range of spherical roller bearings is available, offering the best performances on the market.

Benefits

+24%
LOAD
CAPACITY

x2
SERVICE
LIFE

+20%

LIMITS

High quality material

- High quality grade steel – excellent inclusion property

Mastery of heat treatment

- Better wear resistance
- Dimensional stability up to 200°C

Internal design

- Optimised number and geometry of rollers
- Improved surface roughness
- Surface treated cages

Less downtime,
more profit!

Market dynamic load (%)

Study carried out in 2021, based on the 3 main European market player catalogues

Range overview

* NTN W33 design and SNR design vs conventional design

** d = bore diameter

Technical features

55% of bearing failures are due to lubrication defects, meaning that lubrication plays a major role in ensuring peak performance.

NTN

SNR

E DESIGN TYPE

An improved design for better lubrication

- **No central shoulder section:** higher volume available and lubricant can flow more freely, meaning all parts are constantly lubricated
- **Wider lubrication holes and grooves:** design feature simplifies maintenance and relubrication
- **Improved cage materials and design**

E CAGE DESIGNS

Optimised guidance precision for kinematic property maximisation

EM – Machined solid brass cage

EA – Drawn steel cage

This successful design eliminates the need for a central guide ring, offering you many advantages:

- Less friction and heating in service
- Increased rigidity and stability of the assembly
- Longer life

SNR - EF800 series for high-vibration applications

The EF800 series is equipped with a solid brass cage and is particularly recommended for use in heavy-duty applications and vibration systems.

Benefits

- Increased service life
- Wider maintenance intervals
- Greater operational profitability

Technical features

- Bearing with symmetrical rollers and machined brass one-piece cage centred on the rolling elements
- No floating guide ring or fixed central shoulder section to avoid any risk of a cage/ring seizure in the event of thermal expansion
- Special tolerances for the outer diameter and bore
- Reduced internal radial clearance: The C4 internal clearance of the EF800 series is reduced to 2/3 of the standard C4 internal clearance in order to obtain improved running properties during operation.

Enhanced efficiency of your screeners!

Reduced bore tolerances for cylindrical, tapered and for the outer diameters compared with tolerance ranges of standard series, guaranteeing perfect ring adjustment.

22220			Clearance in microns											
Clearance	Minimum	Maximum	130	135	140	145	150	155	160	165	170	175	180	185
C4	135	180												
Clearance EF800	150	180												

EF800 series = C4 with reduced tolerance

E.g. EF800 clearance value compared to the clearance value of group C4

Range overview

Further dimensions are possible upon request.

*d = bore diameter

SNR - Sealed spherical roller bearings

To prevent contamination if bearings are used in hostile environments, such as outdoors or in dusty conditions, you are advised to use sealed bearings.

Seals have been tested under the most extreme conditions to guarantee their reliability and performance for your applications

Benefits

- Increased service life
- Wider maintenance intervals
- Greater operational profitability
- Environment protection
- Same load ratings as open spherical roller bearings
- Identical internal design to the open bearings with the EA design
- Non-ISO width with a minimal increase in order to integrate seals, "10X" prefix and the suffix "EE"
- Specially designed NBR seal to guarantee impermeability by means of constant contact pressure of the lip, even in the event of misalignment
- Pre-filled bearing with a quantity and quality of lubricant suited to high loads; no relubrication is required for applications below 70°C

Optionally also available in the low-noise version ("-EEL")

The Low Noise grade significantly reduces the bearing's acoustic impact

ALL-IN-ONE,
make your life easier!

**Choose the Spherical
Roller Bearing KITS**

Peace of mind

Offering you an optimal level of service

- **Only one** reference to order (to manage) instead of several
- Kits are composed of specific components to avoid the risk of errors and omissions
- **Fixed or floating** mounting are possible with 1 KIT reference
- Maintenance people **save time** looking for required components. One storage place in the warehouse

Productivity

Improve the performance of your activity

- Economic gain: KIT **cheaper** than retail components
- Sealed spherical bearing KITS: **ECO Friendly!** (vs a standard open bearing)
 - Reduced grease consumption
 - Maintenance interval increased by 3
 - Service life extended by 3

Have a look at our KIT brochure

- Find all range references and component detail
- Multi-market application examples which benefit from kits

[KIZEI][®]

ISO SPHERICAL ROLLER BEARING WITH SHIELDS

NTN is launching an unprecedented solution to extend your bearing service life time! A bearing protected by steel shields on both sides, KIZEI[®] is 100% interchangeable with standard open spherical roller bearings thanks to ISO dimensions. Mounting elements and procedures are identical to that of a standard bearing. This exclusive **SNR** product will dramatically reduce your maintenance costs and improve your equipment reliability!

Armoured to face the dirt!

Brand of **NTN** corporation

SNR - KIZEI® Spherical roller bearings

[KIZEI]®

THE FIRST SPHERICAL ROLLER BEARING WITH METALLIC SHIELDS

NTN Europe's R&D department has pioneered an unprecedented solution to increase the service life of your spherical roller bearings.

Benefits

Improved production performance with longer service life

INITIAL BEARING
1,100 hours in service

[KIZEI]®
2,200 hours in service

Less deterioration to the bearing after a service life lasting **twice as long**

• Reduced maintenance costs

	Open spherical roller bearing	[KIZEI]
Life duration	1 month	3 months
Production downtime	12 times/year	4 times/year
Maintenance costs	100	30

Maintenance costs can be reduced by a factor of 3

• Easy to use

ISO dimensions

- Same dimensions as an open spherical roller bearing

Easy mounting process

- Standard accessories
- Possible clearance measurement of K bores

Regreasing frequency divided by 3

- Compared to an open spherical bearing

Range overview and designations

- 60 part numbers available
 - d = 40mm to 140mm
 - From 22208 to 22228
 - Tapered "K" or cylindrical bores
 - Internal radial clearance CN or C3
- Further dimensions and clearances are possible upon request

DESIGNATION

22208EAKW33ZZ

Technical features

- **Same load ratings and speed limits** as open spherical roller bearings
- **ISO dimensions:** 100% interchangeable with an open spherical roller bearing
- **Premium quality nitrided steel plate cage and shields**
Maximised shock and optimised corrosion resistance
- **Extensive range of operating temperatures** from -40°C to +200°C
Dimensional stability up to +200°C
- **KIZEI® is supplied ungreased:** the initial lubrication process is similar to an open spherical roller bearing; 30% of the free volume must be filled with the appropriate grease. The bearing can be lubricated while in service via the dedicated holes and grooves on the outer ring
- **Optimal misalignment**
- **Internal inspection possible** for easier maintenance
- **Easy mounting process:** no special tools are required and the clearance can be checked after mounting

NTN and SNR - Thrust spherical roller bearings

Thrust spherical roller bearings are intended for heavy applications, generating large axial loads: injection presses, cranes, pumps, mines, quarries, turbines and equipment for energy.

Technical features

- ISO dimensions: 100% interchangeable
- Drawn steel cage
- Optimised number and geometry of rollers
- Accept radial load up to 50% of axial load
- Maximum misalignment up to 2%

Allowable misalignments

Lubrication: thrust spherical roller bearings are usually heavily loaded and must be lubricated with oil. Due to the internal construction of these bearings, grease lubrication is only possible at low speeds and with limited loads.

Range overview

Thrust spherical roller bearings with drawn steel cage.

NEEDLE ROLLER BEARINGS

THE RANGE **MADE IN JAPAN** PREMIUM QUALITY AT YOUR DOOR

NEEDLE ROLLER BEARINGS

NTN provides the widest range of solutions to meet your requirements for needle roller bearings. Premium steel, sturdy design and Japanese manufacturing guarantee optimum reliability and service life. Because our European logistic and technical support teams are close to you, they can provide you with enhanced reactivity.

With its available and competitive wide range, NTN concentrates all its energy on its key concern: you!

NTN®

NTN - Needle roller bearings

Needle roller bearings are compact bearing solutions, with various designs, able to support very high radial load in a reduced envelope.

Benefits

- High radial rigidity
- Low inertia
- Suitable for oscillating movements
- Easy mounting
- Cost competitive technology
- Compact dimensions
- High load capacity

Advantages

- Comprehensive range of needle roller bearings, thrust needle and roller bearings, cam and roller followers and individual parts
- More than 50 years of experience for design and manufacturing
- Undisputed market leadership in Japan and No. 2 worldwide for industrial applications
- > 80% coverage of the market leader's range
- Many well-known references from the automotive and industrial sectors rely on **NTN**'s needle roller bearing range
- Metric and inch needle roller bearings from one supplier: > 2,300 p/n inside the public price list
- Over 320 million bearings produced every year

DID YOU KNOW?

What is the definition of a needle?
A needle is a roller that fulfils the 2 following conditions:
An outer diameter $D_w < 5 \text{ mm}$
A ratio "Length L_w / Diameter D_w " between 3 and 10.

A step ahead
with quality

Focus on “HK-F” new generation drawn cup

NTN

OUTER RING

Carburised Chrome Molybdenum steel

Higher hardness ► higher static loads ($S_o \geq 2$, was $S_o \geq 3$)

Redesigned ribs ► improved oil flow inside bearing

Optimal outer ring shape (chamfer and surface)

► smooth press fitting inside the housing

CAGE

V-form of the cage

Improved oil flow inside and better stability ► increased reliability

Case hardened and tempered or soft nitrided

Reduction of wear ► increased reliability

NEEDLES

Special heat treatment

Special carbonitriding ► proven extended service life

Optimised crowning

Better distribution of contact stresses ► extended service life

Designations

HK1512 F M

HK-F TYPE

PRE-BENT PROCESS

ENHANCED MANUFACTURING PROCESS

No deformation of the outer ring after heat treatment

(« Pre-bent » process, with additional « M » suffix)

► both sides could be used for mounting

CUSTOMER BENEFITS

- Improved lifetime: 3x longer
- Higher static loads (with lower S_o): 1.5x greater
- Easier mounting

SOLID LUBRICATION

Solid lubrication

NTN

SNR

A lubrication solution, developed to provide permanent feeding of the rolling elements.

A big quantity of lubricating oil is stored inside a porous polymer matrix. Under the effect of thermal and mechanical stresses, the oil is slowly released from the matrix.

The solid consistency prevents grease ejection and feeds all rolling elements continuously.

THE STRENGTH OF A GROUP TO BENEFIT FROM THE MOST ADVANCED TECHNOLOGIES

	Oscillations	Centrifugation	High pollution	Speed	High pressure washing
INSERTS	FULL PACK		FULL PACK	SPOT PACK* NTN	FULL PACK
DGBB		FULL PACK			
NRB					
SRB					
CRB	SNR	SNR	SNR		SNR

Suitable for:

- General purposes
- Food grade (NSFH1 certification)

*Spot pack: the matrix is filled by pockets between each rolling elements, thereby providing constant lubrication while maintaining a good level of rotation speed

BEARING UNITS

Self-Aligning Bearing Units

High quality and value, availability, adaptability... This is the motivation behind the development of our bearing unit range. We know that it is important to optimise your investments. Our products, which are ideally suited to your applications, have an exceptional value for money. You can rely on our extensive experience to find a solution which meets your requirements.

Accessible quality

Brand of NTN corporation

SNR - Bearing units with cast iron housings

Sealed deep grooved ball bearing, which can be mounted to a housing by means of its spherical outer ring.

Technical features

- Easy assembly / disassembly
- Robust design
- Universally applicable
- Lubricated and sealed for life
- Quickly ready for operation
- Cost effective
- Compensation of shaft misalignments
- Powder-coated cast iron housings

Benefits

One stop shop for all your bearing unit needs

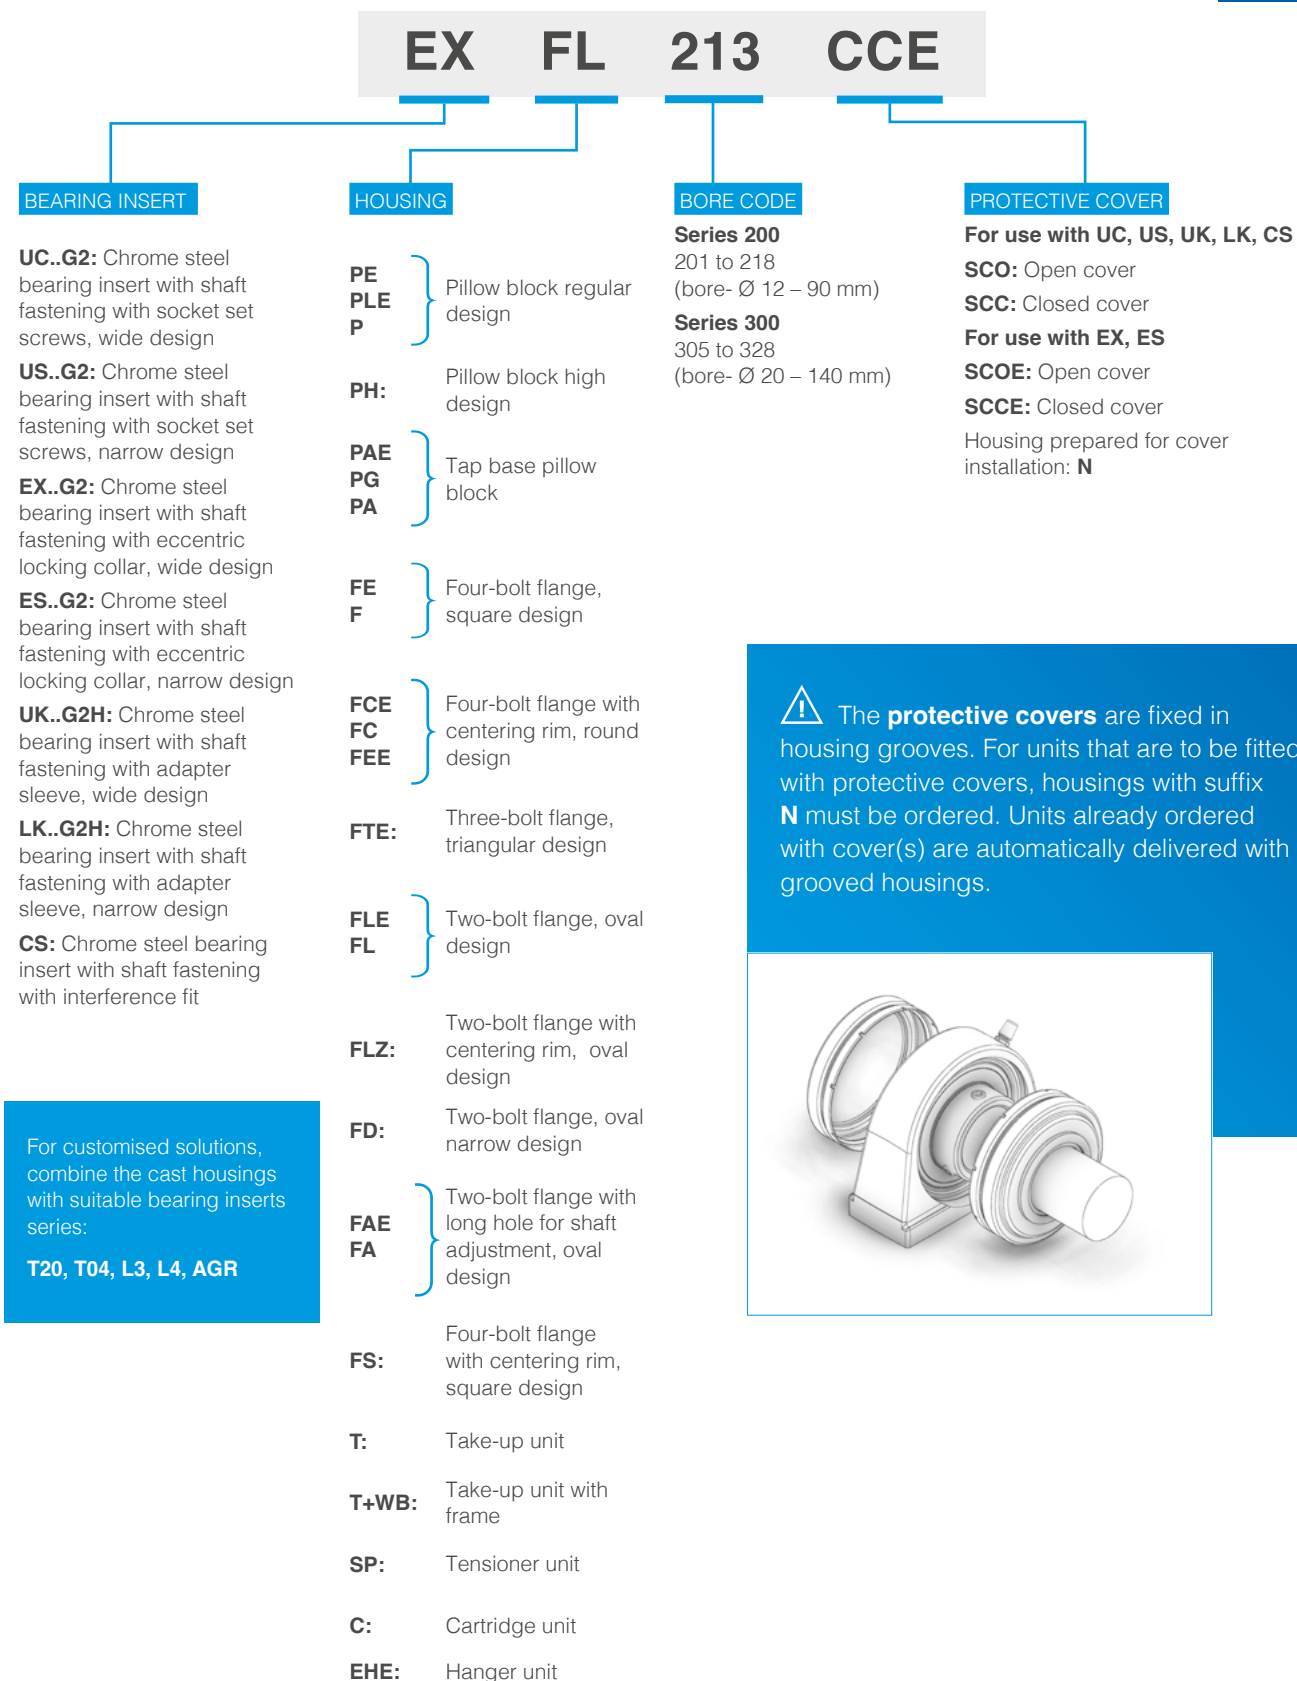

- Save time and money
- Find everything that you need in our comprehensive range of quality products from JIS- and ISO- standards

Improve your reactivity thanks to short lead times

- Control emergency situations
- A high level of product availability in our European Distribution Centre allows you to manage all situations

Optimise the output of your machines with our complete product expertise

- Define the best suitable bearing unit combinations
- Benefit from the advice of our highly skilled engineering team for your specific applications

SNR - Bearing units with pressed steel housings

Best economical solution for lightweight constructions

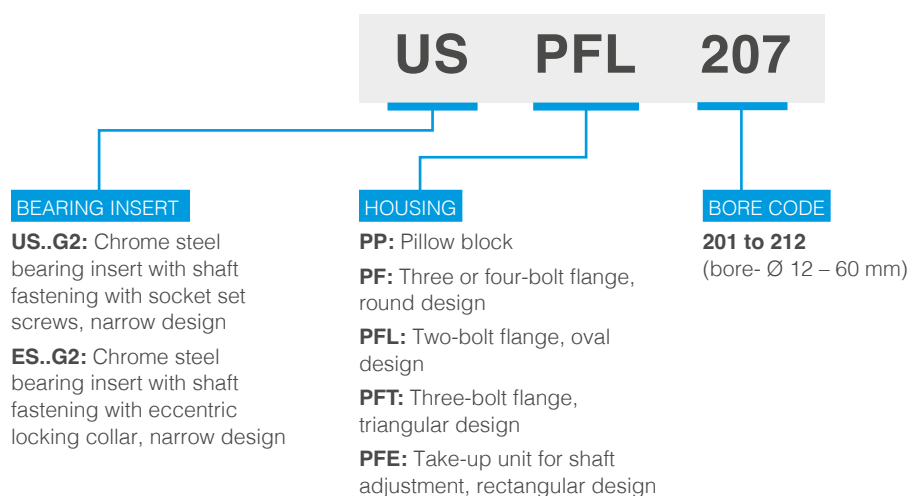

Benefits

- Particularly used in applications where weight is a major constraint

Technical features

- Two-piece housing made from zinc coated sheet steel
- Available as pillow block, flanged or take-up unit
- Suitable for narrow ball bearing inserts set screw type US..G2, eccentric locking collar type ES..G2 and type CS with interference fit
- Made for low to moderate loads & speeds

Designations

SNR - Bearing units with stainless steel housings

Benefits

Premium line

- Optimum performance with a strong focus on protection from oxidation, mould, bacteria and chemical cleaning agents
- High performance lubricant
- High-quality stainless steel
- Relubrication facility on all housings

Resilient

- Excellent mount stability and impact resistance
- Recess-free housing contact surface to prevent deposits of the process material
- Designed to withstand aggressive cleaning and corrosive environments
- Open or closed protective covers from stainless steel available for all housings

Less downtime, more profitability

- Protective covers for units provide additional protection during high pressure washdown

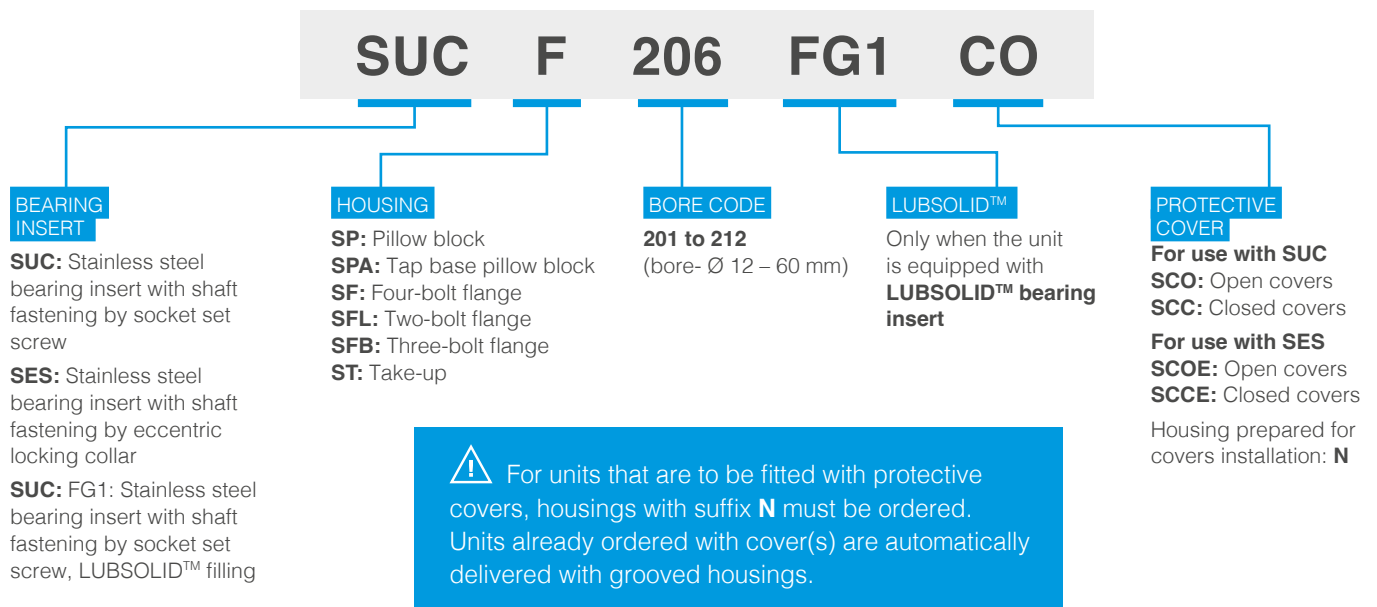

Technical features

- 100% stainless steel resistant to corrosion: will never chip and contaminate the end product
- Food-grade seal with additional slinger (SUC)
- USDA H1 grease fully compliant with FDA regulations
- Shaft fastening by set screw or eccentric locking collar
- Metal cage
- The protective covers are fixed in housing grooves

**SUITABLE
FOR THE
USE OF
LUBSOLID™
BEARING
INSERTS**

Designations

SNR - Bearing units with thermoplastic housings

Benefits

Easy to clean

- Resistant to numerous chlorine-containing and corrosive cleaning solutions
- Insensitive to bacteria formation
- Recess-free housing contact surface to prevent deposits of the process material
- Protective caps for units to provide additional protection against regular wash downs
- Smooth surfaces

Resilient

- Good friction and wear properties
- Mounting holes reinforced with metal bushings
- Equipped with bearing inserts from stainless steel

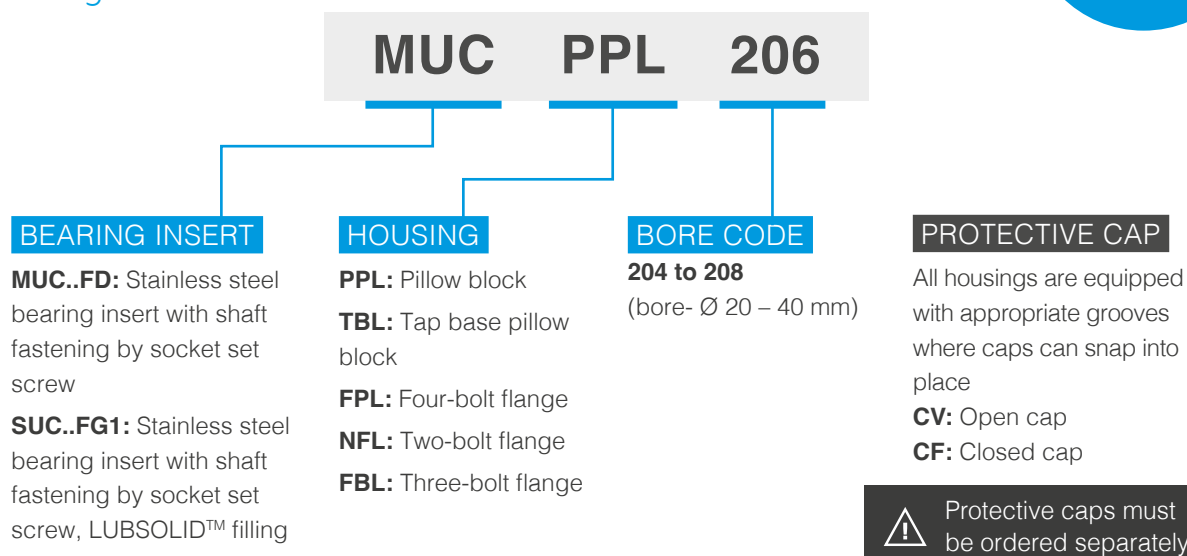

Technical features

- 100% stainless steel bearing inserts resistant to corrosion: will never chip and contaminate the end product
- All metallic components made of high-quality stainless steel
- Food-grade seal with additional slinger
- High performance lubricant according to NSF H1
- Metal cage

Specific features

- Relubrication facility on all housings
- Additional protection through open or closed end covers (tool-free installation)
- Can optionally be combined with food-grade solid grease bearing insert

Designations

SNR - SENTINEL™ series

SNR stainless steel insert with full-pack LUBSOLID™ (FG1) as lubricant for bearing unit application (thermoplastic or stainless steel housings) is the best opportunity to mix security for food/beverage industries and sustainability for the production equipment.

Technical features

- 440C stainless steel bearing, 302 stainless steel cage and slingers
- Specific silicone seals with 302 stainless steel reinforced
- Anti-rotation pin on outer diameter
- **SNR** full-pack LUBSOLID™ (FG1), NSF approval / H1 category code
- Operating temperature: from -10°C to +80°C (100°C peak)

Benefits

- 440C material is the best compromise between load rating capacity and corrosion resistance
- LUBSOLID™ avoid leakage even when bearings are subjected to high vibration and centrifugal force
- Compare with general-purpose food grease lubricant, solid grease is less prone to emulsification and leakage due to water penetration
- LUBSOLID™ with full-pack application confer an additional barrier against pollution

Range overview

- Code bore P/N inserts from 204 to 210 (Shaft diameter 20 to 50 mm)
 - Thermoplastic housings: 5 designs
 - Stainless steel housings: 6 designs
- For housing information, see previous pages about stainless steel and thermoplastic bearing unit

Designations

THE ULTIMATE SHIELD AGAINST CONTAMINATION

A commercial success for the past 5 years in America, the SENTINEL™ range is finally coming to Europe! A real revolution in the food-processing market, all bearing units and ball bearings in this series are sealed and equipped with solid lubrication. Resistance to water infiltration and various contaminants, elimination of grease leaks and reduced maintenance interventions make this range the perfect recipe for meeting your environmental, safety and productivity requirements.

SENTINEL™ SERIES, the ultimate shield against contamination.

NTN®

Sealing solutions

Seals for insert bearings		References	Technical characteristics	Benefits
		One-lip seal with protective edge	Zinc-coated sheet steel retainer* with vulcanised seal. The axially preloaded seal lip from NBR** is located behind a protective edge. * Stainless steel for SES Black-oxide-coated for T20 ** Silicon for SES and design T20	<ul style="list-style-type: none"> • Normal environmental conditions • Medium to high rotation speeds

** LUBSOLID™ filling.

Protective caps & covers

Benefits

- Improvement of safety characteristics (safety at work)
- Protection of the bearing from external influences such as impact loads, dust, dirt or moisture ingress
- Protection against lubricant leakage (especially for covers)
- Can be used for shaft-end or through-shafts

Stainless steel covers for bearing units series

SUFFIX	Description	Cover type	Suitable in combination with bearing insert type:	Design
CC	Bearing unit with narrow cover (closed version)	SCC	Set screw, adapter sleeve, Fit	
CO	Bearing unit with narrow cover for metric shaft (open version)	SCO		
COU	Bearing unit with narrow cover for imperial shaft (open version)	SCOU		
CCE	Bearing unit with wide cover (closed version)	SCCE	Eccentric locking collar	
COE	Bearing unit with wide cover for metric shaft (open version)	SCOE		
COEU	Bearing unit with wide cover for imperial shaft (open version)	SCOEU		
N	Unit / Housing prepared for cover(s) installation	-	/	

Bearing units that are ordered with cover(s) include the housings with grooves. If you want to install the protective covers later, housings with suffix N must be ordered (for example: P210N).

Protective caps for bearing units series

CAP TYPE / SUFFIX	Description	Suitable in combination with bearing insert type:	Design Open / Closed	Notice	
PCO	Protective cap for bearing inserts type G1N (open version)	US..G1N / ES..G1N		Protective caps have to be ordered separately from the bearing units.	
PCC	Protective cap for bearing inserts type G1N (closed version)				
CV	Protective cap for thermoplastic series (open version)	MUC..FD			
CF	Protective cap for thermoplastic series (closed version)				
-G1N	Bearing insert with groove in the outer ring				

- The installation of protective caps can be done tool free. For mounting the yellow pressed steel caps bearing insert series G1N must be installed to the bearing unit. These bearings have a special groove machined in their outer rings in which the protector can snap into place (for example: US206G1N).
- All thermoplastic housings are equipped with appropriate grooves where caps can snap into place.

Suitable for stainless steel housings

Suitable for thermoplastic housings

SPLIT PLUMMER BLOCK HOUSINGS

ALL INCLUSIVE - PERFORMANCE - INNOVATION

SNCD

LARGE PLUMMER BLOCK HOUSINGS

The SNCD large plummer block range has been developed by **NTN** for highly demanding industrial applications. Equipped with spherical roller bearings for a shaft diameter from 115 mm to 500 mm, the SNCD range is perfectly designed to bear heavy loads. Important features such as connectors for temperature and vibration monitoring are already included as standard just like machined stop edges and grease drain holes. Thanks to the use of heavy-duty ductile iron and the innovative design concept, the SNCD split plummer block housings are capable of reducing the stress level of the bearing and increasing its service life.

All inclusive as standard

Brand of **NTN corporation**

SNR - SNCD housings

SNCD housings are made for support spherical roller bearings with tapered or cylindrical bore. The split housings are available for fixed or floating bearing arrangement and can support bearings with shaft diameters from 115 to 500 mm.

Benefits

Interchangeable

- Full interchangeable with grey cast
- Compatible with market standards

More than 400 arrangements possible

- Suitable for 222, 223, 230 and 231 SRB series
- Cylindrical bores or adapter sleeves solutions
- Metric and imperial dimensions

One global supplier

- Housings, bearings and accessories
- Technical assistance (study and recommendations)
- Service engineering

Technical features

All inclusive

- 1 Machined stop edges
- 2 Housing positioning mounting bores
- 3 Grease nipple connections (grease nipple attached)
- 4 Grease drain holes
- 5 Machined surface for condition monitoring systems
- 6 Ready to use connection for temperature sensor
- 7 Ready to use connection for vibration sensor

SNR - SNC / SNCD500

- SN housing according to ISO113-2010 for bearings with a cylindrical or tapered bore
- High stiffness and stability due to special design elements
- Reduced stress in the bearing
- Extended service life and prolonged service intervals
- For shaft diameters from 20 mm to 140 mm
- Housing material: cast iron with flake graphite and/or spheroidal graphite (SNCD500)
- 5 different seal arrangements for a wide range of applications
- User-friendly design features for ease of service and rapid installation

Also available as heavy duty version from spheroidal graphite cast iron and with different mounting bore pattern

Sealing

SC...DS

Double leap seal
Multipurpose seal

SC...FS / SC...FSS*

Felt strip seal
Well suited for higher rotational shaft speed

*With steel retainer

SC...SV

V-Ring seal
Reduced friction

Optional V-ring
for better sealing
effect in downtimes

SC...LA

Labyrinth seal
Well suited for high temperature applications

SC...TA

Taconite seal
Multiple seal for harsh environments

Multi-market kits

66 kits available in "normal clearance" or "C3 internal clearance" for shaft diameters from 35 mm to 90 mm.

ALL-IN-ONE,
MAKE YOUR
LIFE EASIER

SNC HOUSING SEALED KIT

including a sealed spherical roller bearing and specific accessories

SNC HOUSING STANDARD KIT

including an open spherical roller bearing with specific accessories and a monopoint greaser

CMD CUSTOMISED MODULES

SNR - CMD customised modules

Ready to be installed
in your specific application

- The **NTN** team develops individual mounted units together with you according to your requirements
- An optimal design for a robust and sustainable system solution
- Taking into account your application parameters, operational reliability and costs, we define the necessary materials and all components

Example: ready-to-install customised module for industrial washing machine

Individual complete solutions
for maximum performance

- **Reduce your effort** and rely on system solutions
- **Optimise and complement your team** with our experts

- **Choose a safe and easy installation** thanks to individual and ready-to-install mounted units
- **Operational safety and warranty.** We guarantee security through decades of experience: application knowledge and production know-how in the international network

Benefits

- One point of contact
- Your application optimised through modifications
- Our quality

Contact us and we will develop
your individual solution together! cmd@ntn-snr.de
Or use our inquiry form

**NTN, your
engineering
partner**

NTN

○ LINEAR MOTION

Brand of NTN corporation

CUSTOMISED LINEAR AXES

Brand of NTN corporation

SNR - Customised linear axes

Our company produces one of the broadest product ranges of linear axes on the market.

Benefits

Cost reduction through reduced design and assembly effort

- Simplification of logistical processing
- Avoidance of assembly errors

Why linear axes?

- Complete systems including guiding and drive system
- Partially closed - optimal protection against dirt
- Reduced effort on the customer side (design, purchasing, assembly)

Drive systems

TOOTHED BELT

SCREW DRIVE

RACK AND PINION

LINEAR MOTOR

Advantages

Linear Axis with toothed belt drive:

- Integrated drive + deflection system
- Best ratio of stroke to total length

Rack and pinion drive:

- Several tables can be moved asynchronously

Systems for every branch

- Can be combined with the entire portfolio
- Including connecting elements, energy chains, switches etc.

Telescopic Axis

- Versions for horizontal and vertical use

Standard &
special solutions
for mechanical
engineering

STANDARD LINEAR AXIS

BUILD YOUR OWN SOLUTION

STANDARDISED LINEAR AXIS

AXE linear axes are the perfect combination of technical expertise and practical solutions for customer needs.

Thanks to an online configurator based on standard component definition, high quality AXE module design is immediately and easily accessible for all. Production and logistics managed in Germany guarantee an outstanding delivery lead time for these linear axes.

Our offer includes all the elements required to finalise safe implementation for the customer.

AXE, thousands of available combinations to build your own solution.

Brand of NTN corporation

SNR - Standard linear axis

With the standard AXE Linear Axis, NTN starts the digital selection of linear axes with new internal processes.

Benefits

- Minimal production time thanks to the modular structure
- All accessories are available as assembling groups

Why AXE?

- Shortest delivery time (1-2 weeks ex works)
- Standard Multi-Axis system including all connecting elements, energy chains and switches
- Reduced effort on the customer side (design, purchasing, assembly)

Range overview

Linear Axis with toothed belt drive
AXE-Z

Standard Multi-Axis systems

Linear Axis with toothed belt / Ω drive
AXE-A

Standard accessories

Good to know!

When building linear axes, **NTN** complies with the EU Machinery Directive and the associated standards.

Interesting industries for linear axes: packaging industry, material handling, automated production and assembly lines, etc..

Guiding systems

LINEAR GUIDES

HIGH LOAD RATINGS

HIGH TOLERANCE
COMPENSATION CAPACITY

LOW MAINTENANCE

Drive systems

TOOTHED BELT DRIVE

HIGH DYNAMIC

GREAT LENGTH

LOW WEAR

Advantages

Online configuration

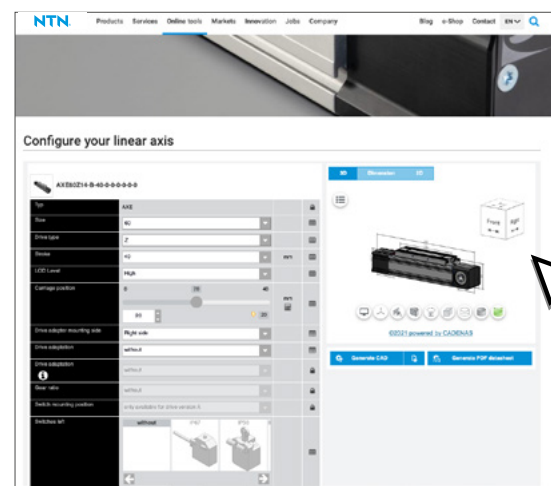

- Inclusive gearbox, drive adaption, switches...
- Part list generation for the selected product

Shortest delivery time

- Standardisation of all components
- Modular design

Made in Germany

- Single axes
- Standard multi-axe systems

Standard
solutions
for mechanical
engineering

LINEAR GUIDES

Brand of NTN corporation

SNR - Linear guides

Two technologies - one geometry - one rail per size (modular system).
According to DIN ISO 12090.

**LGBC...
(BALL CHAIN TYPE)**

DF CONFIGURATION

**LGBX...
(CONVENTIONAL TYPE)**

Lubrication options

- Lateral lubrication channels closed with set screws = simply switch between the lubrication points
- Lubrication option from above as standard
- Fixable adapters for high carriage types

Jointed rail

The rail joint is always marked with a "J" (J = Jointed Rail!)

- No assembly sequence - error prevention!
- Simply replace in case of damage - measure the length, done!
- Easy to extend

Extension of interchangeability

Separate delivery of carriage and rail up to precision class "P" possible!

**One step ahead
with quality for
over 30 years**

Maximum lengths

- Standard rails LGBR 15...55 ~ 4.000 mm
- Miniature rails
 - LGMR, narrow 09...15 ~ 2.000 mm
 - LGMW, wide 09...15 ~ 2.000 mm
- Miniature rails LGMR 07 ~ 450 mm

Accessories

- Clamping elements
- Central lubrication
- Brass caps
- Cover strip
- etc.

* available only in certain territories

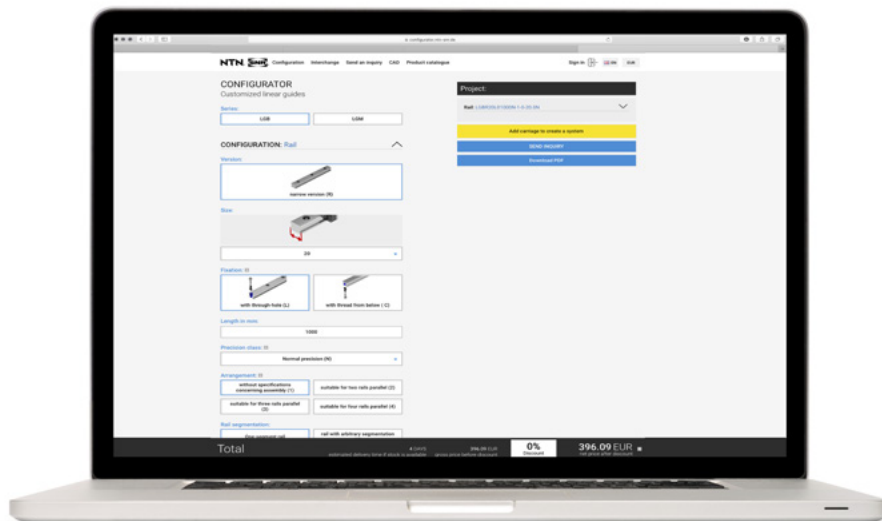

Extremely powerful ball chain

Spacer ball for smooth ball circulation

Online configuration

BALL SCREWS

The new range of LINEAR MOTION BALL SCREWS

Handle motion with precision

SNR ball screws are high-quality products that are among the most important drive elements for mechanical engineering in linear technology. Our new whirled ball screws offer you an optimal price-performance ratio and meet the highest requirements in terms of precision. Many screw diameters, pitches and nut designs offer a high degree of flexibility for your application.

Ball screws are precision products designed to meet your needs.

Brand of **NTN corporation**

SNR - Ball screws

We offer all manufacturing technologies:

Rolling, whirling, grinding

Tolerance classes

- Transport Ball Screws (T10, **T7**, **T5**, T3)
- Positioning Ball Screws (**P5**, P3)
Blue marking is our standard

Preload

To increase the rigidity:

Z0 = axial clearance

Z1 = without axial clearance, without preload

Z2 = light preload (~ 3% Ca)

Z3 = medium preload (~ 5% Ca)

Z4 = high preload (~7% Ca)

Higher preload normally with double nuts!

**SNR Ball
Screws: Easy to
work with!**

Fixed and floating bearing units

European range:

Type BSTK / BSTL

Asian range:

Type BK / EK / FK / BF / EF / FF

Lubrication

There is no lifetime lubrication for ball screws!

In general, the same greases should be used as for Linear Guides + Bearings.

Standard &
special solutions
for mechanical
engineering

NTN

BALL BUSHINGS

Brand of NTN corporation

SNR - Ball bushings

Extensive support from NTN.

ISO standard & JIS standard.

One of the widest product ranges on the market.

Application

- General engineering
- Wood working industry
- Fitness equipment
- Packaging machines
- Medical equipment

Why ball bushings?

- Cost-effective implementation of linear movements
- Self-supporting guide, which is clamped at the ends
- Minimised maintenance effort due to low lubricant consumption
- Low friction
- Interchangeable: diameter, length and grooves are standard

Which ball bushings?

STANDARD BALL BUSHINGS

- Same dimensions and tolerances as super ball bushings
- $v_{max.} = 1,5m/s$
- Damp or wet environment
- Suitable for vacuum applications
- High temperature versions

SUPER BALL BUSHINGS

- Same dimensions and tolerances as standard ball bushings
- $v_{max.} = 3m/s$
- Misalignment compensation up to $\pm 0,5^\circ$
- Higher load ratings
- Smooth running performance
- Same loads ► smaller size
- Reduced system costs!

**Ball bushings
for simple and
inexpensive
implementation
of linear
movements.**

Widest product ranges

SERVICES, OUR OFFER

Because your industrial performance is essential to your future success, **NTN** is committed to increasing the longevity of your equipment while reducing your maintenance costs through a range of services.

Our experts are at your side to offer you assistance and training services, as well as tools and lubrication solutions to maximise the life of your bearings.

Brand of **NTN** corporation

MAINTENANCE TOOLS

SmartTEMP Induction Heater

Looking to increase your machine's reliability in order to reduce your operational costs? Discover the SmartTEMP by **SNR**, an innovative induction heater range. With its intelligent heating modes, it maintains the integrity of your sprockets and bearings, to ensure optimal mounting, necessary to achieve your goals.

The premium heating solution for all your mechanical components.

Brand of **NTN** corporation

SNR - Induction heaters: SmartTemp

The only tool to control the heating of bearings, sprockets, spacer rings...

Why this new generation of heater is the best on the market?

- LOW OPERATING COSTS**

Heating bearings and sprockets properly before assembling is crucial to ensure a longer service life of your equipment

- EFFICIENT**

Best solution on the market to heat mechanical parts with less energy consumption 24 hours a day, 7 days a week, 365 days a year

- EASY TO USE**

Thanks to its innovative touch screen, set up, monitoring, data extraction are extremely simple

Technical features

SNR - Hydraulic nuts

Simple and safe assembly / disassembly of rolling bearings with a taper bore.

Precise and reliable adjustment of the radial internal clearance of rolling bearings with a taper bore.

Why is this hydraulic nut the best on the market?

- Unique with its patented Back & Forth system (piston moves back automatically)
- Special surface treatment to protect against corrosion
- Knurling on the outside diameter for easy and safe handling
- The “emergency stop function” prevents the piston from falling out
- Extensive standard range in stock

Applications

- Mines and quarries
- Paper mill
- Wind mill
- Cement factories
- Railway
- Steel industry
- Construction machinery
- Heavy machinery industry and much more

Interchange

Thread	Sizes	Sizes	Sizes	Sizes	Weight
metric	metric	metric	metric	metric	kg
G	SNR	SKF	FAG new	FAG old	approx.
M 50x1.5	HMV 10 EBF	HMV 10E	HYDNUT50	RKP50	2.9
M 55x2	HMV 11 EBF	HMV 11E	HYDNUT55	RKP55	3.0

The interchanges are given for information only and you should check that the chosen product corresponds to your requirements. In case of doubt, please do not hesitate to contact us.

SNR - Other maintenance tools

SNR brand offer also includes a large range of mounting and dismounting tools such as fitting tools, bearing pullers, wrenches...

Bearing pullers

Cold mounting case

Hydraulic pump

LUBRICATION SOLUTIONS

SNR - Single point lubricators

READY – DRIVE – SMART: The ultimate weapon for automatic lubrication.

READY booster

Economical and reliable

- Significant savings due to the flexibility of use (1-12 months and stoppable)
- Suitable for tight and restricted areas (Ex proof)
- Ready to use: no assembly and no tools required
- Only one lubricator for all of your applications: inside and outside (-20°C up to 60°C)
- IP68 protection class: reliable lubrication even in extremely moist and dusty areas

Due to its compact size, the Ready Booster can be used in various applications: bearings, plunger block, chains, electrical motors, fans, pumps, conveyors, etc.

DRIVE booster

Powerful and precise

- Independent with its powerful battery pack
- Powerful: suitable for remote greasing
- Precise: discharge period from 1 to 12 months
- Easy-to-use refill cartridge

For extremely accurate lubrication, independent of temperature and ambient pressure, extremely reliable in use.

SMART booster

Effective and technical

- Accurate, ergonomic
- Adjustable to the nearest month on the LCD screen
- Constant flow, independent of ambient temperature
- Recyclable: re-usable control unit
- Suitable for use in explosive areas

Effective, precise, flexible lubrication for applications subject to wide variations in temperature or situated in explosive environments.

Grease options

UNIVERSAL + HEAVY DUTY +

VIB

HIGH TEMP MP

FOOD

FOOD CHAIN OIL

CHAIN OIL

DESCRIPTION

General purpose grease for industrial use.

Suitable for very high loads, compatible with many applications, intended for arduous applications.

Parts subject to extensive vibrations or impact. For high-load applications in humid environments.

This grease is ideal for long-term lubrication at high temperatures up to +180°C.

Multi-purpose grease for the food and pharmaceutical industries. Complies with NSF-H1 recommendations.

Food-grade oil for chains designed for the food-processing and pharmaceutical industry. Complying with NSF-H1 recommendations.

Synthetic oils for high temperature chains.

SNR - Multipoint lubrication solution

POLIPUMP: low cost and easy to implement centralised greasing.

Benefits

- **A cost-effective choice**
- **An economical and effective solution**
Possibility of lubricating 1 to 35 points with the grease of your choice up to a distance of 20 meters
- **Environmentally friendly and easy to implement**
No technical skills are required for the installation of central lubrication system. Ready to use and easy to refill, this environmentally friendly pump will continue to help reducing your waste

Applications

- **Industry**
POLIPUMP can be used for the lubrication of bearings, plain bearings, open gears, chains, ball screws, linear guidance, etc.
- **Vehicles and chassis (agricultural, building, trucks...)**
A specific version of POLIPUMP has been designed for applications on earth moving equipment, agricultural machinery, trucks, etc.

Lubrication range

SNR BRAND OFFERS A SELECTION OF PROFESSIONAL GREASES THAT SHOULD MEET MOST OF YOUR NEEDS.

SERVICES

Training / e-learning

E-learning program

9 modules and 9 quizzes to reinforce your knowledge about bearings.
Learn when and where you wish thanks to our E-Learning platform!

Seminars

With our tailor-made trainings, we respond precisely to your requirements when it comes to the safety of your staff and machines during handling, installation, removal, lubrication of various rolling bearings or linear products.

- Seminar program
- Standard seminars / tailor-made seminars
- At one of our training centres, at your location or online (e.g. web seminars)

Technical support and commissioning maintenance

- Assessment of current situations
- Supervising, assembly / disassembly support
- Optimisation of the assembly process
- Support to use new tools
- Assembly method development for specific problems

Bearing diagnosis

- Initial assessment
- Neutral reports

Advice on lubrication

- Lubrication systems (single point, centralised pumps)
- Lubricants
- Lubrication intervals and quantities

Tool rental

- HMV (hydraulic nuts)
- Induction heaters

Experts
at your service

NTN

ADDITIONAL TECHNICAL PRODUCTS

Constant velocity joints for industrial applications

From **NTN** technical knowledge

- Know-how of the second largest manufacturer on the market
- Jerk-free and vibration-free solutions, even for large angles
- Available as standard as 3-ball joint shafts (TBJ) and as 6-ball joints (BJ)
- Examples of applications: machine tools, glass industry, industrial washing machines, loading machines, steel and iron industry etc.

For more information, please contact us.
