

Brand of NTN Group

AUXILIARY KIT WITH WATER PUMP

The Brand New SNR Range

This brand new range of Auxiliary kits with water pump offers an efficient and quick answer to all the mechanics. Thanks to these kits, you can work peacefully during the replacement of the auxiliary system.

SNR KAP new range: one part number to change all the elements of the auxiliary system.

You have the insurance to change the good parts, quickly and are sure to replace it by OE quality parts for all the elements.

Quality and security

Modern vehicles have more and more complex auxiliary system, resulting an increasing of tension on the elements. It becomes **essential to change all the auxiliary elements**. Indeed, the tensioners and the water pump, as the belt, are wearing parts. A part not replaced might damage the belt, or in the worst cases, the whole engine.

For the vehicle owner this reduces

- Labor costs and vehicle downtime
- The risk of an auxiliary system failure or severe engine damage

ACCORDING TO VEHICLE APPLICATION, THE KITS ARE INCLUDING:

Belts

Our range of belts conforms to all OE standards and requirements, we apply these same OE standards and requirements to the manufacturing of our engine timing system rollers, auxiliary system rollers and wheel bearings.

Tensioners & idlers

NTN is an **original equipment manufacturer**, supplying all the major European and Asian vehicle manufacturers and their global operations. NTN produces auxiliary rollers and many of the bearings used with in the rollers themselves.

Water pump

NTN has genuine OEM expertise: **more than 1 million water pump bearings are manufactured in our factories each year.**

The water pump bearings feature a specific NTN design. NTN is the partner of the major vehicle and water pump manufacturers.
