

PRESS RELEASE – APRIL 2022

Spring is here and NTN relaunches its “Spring Promo Days”

Every season since the summer of 2020, NTN has made a special promotional offer to vehicle repairers. From 25 to 29 April 2022, the global automotive industry leader is reactivating its “SPRING PROMO DAYS” operation on selected part numbers from its SNR strut bearing kit range.

Once again this spring, NTN is lending professionals a hand by inviting them to take advantage of a flash promotion on 13 part numbers from its SNR strut bearing kit range. As an integral part of a vehicle’s road holding, suspension components play a vital role in automotive safety. Manufacturing this technically complex product requires genuine expertise. For more than 100 years now, NTN has been developing 100% made-in-France know-how specifically related to this part. Manufacturing 30 million strut bearings per year at its plant in Seynod, France, NTN is now one of the uncontested leaders in the segment.

For every purchase of an identical pair the following SNR kits covered by this offer, professionals will receive a discount on the order* (**recorded average of 15% in Europe**):

- KB95009
- KB95411
- KB95408
- KB65932
- KB65542
- KB96507
- KB95716
- KB65554
- KB65003
- KB95715
- HB68001
- KB95023
- KB65317

To take advantage of this special promotion, distributors can visit the NTN e-shop or get in touch with our local NTN representative.
