

PRESS RELEASE – JULY 2022

NTN expands its CVJ range with 280 new references.

NTN launched its CVJ range back in 2017, the range has continued to grow since its initial launch. 2022 will see a sizeable expansion of the range with a further 280 references being added to the range. The latest extension will bring the total number of parts in the range to over 900 references. NTN is planning further increases of the range, this will see a range covering more than 1000 references by 2023.

In view of the growing demand for OEM-quality drive shaft kits, boot kits and CV joint kits, NTN wants to establish itself as one of the leaders in the CVJ market and is currently accelerating the development of its already comprehensive product range. Within the CVJ market, NTN uses its knowledge and the technical expertise gained over the course of many years. NTN is one of world's leading original equipment manufacturers, the Group produces more than 40 million CVJs at its 15 factories in Europe, Asia and the USA. NTN CVJs are in-house designed at one of its 5 R&D centres in France and Japan.

Already well-established in the European, African and Middle East regions, NTN is aiming to consolidate its presence in today's market with the major expansion of its CVJ range. More attractive and competitive than ever, this range comprising more than 900 parts enables the manufacturer to address the automotive aftermarket even more effectively.

The latest 280-part extension is made up of 136 drive shaft kits, 80 boot kits and 64 CV joint kits. Together these additions represent a 54% increase in the range. The new range extension includes many of the top selling part numbers that many European customers have been requesting.

"We are very pleased to unveil this new product range expansion. Even better suited to motor vehicles registered in Europe, it enables NTN to cover both recent and older applications," explains Romain PETELLAZ, Product Line Manager of the CVJ range for NTN Europe. *"It's also a strategic decision, because by reinforcing our CVJ offering we are enhancing our reputation as a specialist and OE supplier. This directly supports our goal of becoming one of the leaders on the CVJ market within the next few years. To that end, we will continue to expand this product range with the aim of carrying more than 1000-part numbers by 2023"*

The expansion of the product range is supported with

technical data, Techinfos (how to fit) brochures, posters and catalogues. Fitment videos can also be found on the SNR YouTube channel.
