

## PRESS RELEASE

### New "Performance Inside" NTN-SNR 2019 timing catalogue

**In keeping with its tradition of excellence in the design and production of its catalogues, NTN-SNR is now offering its new 2019 timing catalogue dedicated to passenger cars and light-duty vehicles on the Aftermarket.**

**Fully dedicated to the engine timing system, this new 700-pages catalogue contains a complete range of 1243 references, 127 of which are new. It offers a wide range of products to the professional of the aftermarkets parts distribution channels and to the mechanics, covering all the brands of the European and Asian markets.**

#### **A complete NTN-SNR range**

In order to meet the growing requirements of professionals, NTN-SNR is offering a new 2019 engine timing catalogue. A proper work tool that is even more practical and efficient, several chapters are devoted to various product families:

- Tensioners and idlers (single parts)
- Timing kit with and without water pump
- Kit for belt-in-oil vehicles
- The new range of timing chain kits (available soon)

#### **A work tool designed for professionals**

With clear table of contents and a layout that ensures an easy reading and understanding, as well as the systematic use of products' pictures and symbols, searching for an item takes no time at all. The search criteria are as follows:

- The vehicle application
- The original part number
- The NTN-SNR part number

Furthermore, in order to meet growing international demand, this edition is available in nine languages (French, English, German, Italian, Spanish, Portuguese, Russian, Polish and Dutch).

## **The TechScaN'R app: prioritizing service**

The TechScaN'R app for smartphones and tablets provides access to all the online technical information once the NTN-SNR reference has been scanned & recognised in the catalogues, or anywhere else. It also offers video tutorials for assembly, a view of the component part in augmented reality, assembly instructions and vehicle applications. TechScaN'R has recently been expanded and now covers all the references from the NTN-SNR range and integrates manufacturer recommendations. It's a useful application for knowing which parts need to be ordered.

This new catalogue perfectly demonstrates NTN-SNR's commitment to its distributor partners through its global offer of services.
